

**Compiled Accounting Standard**

**AASB 101**

# **Presentation of Financial Statements**

---

This compiled Standard applies to annual reporting periods beginning on or after 1 July 2008 but before 1 January 2009. Early application is permitted. It incorporates relevant amendments made up to and including 13 December 2007.

Prepared on 7 November 2008 by the staff of the Australian Accounting Standards Board.

 IMPLEMENTATION GUIDANCE ON IAS 1 (available on the AASB website)	

Australian Accounting Standard AASB 101 *Presentation of Financial Statements* (as amended) is set out in paragraphs 1 – Aus126.6. All the paragraphs have equal authority. Terms defined in this Standard are in *italics* the first time they appear in the Standard. AASB 101 is to be read in the context of other Australian Accounting Standards, including AASB 1048 *Interpretation and Application of Standards*, which identifies the Australian Accounting Interpretations. In the absence of explicit guidance, AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors* provides a basis for selecting and applying accounting policies.

## COMPILATION DETAILS

### **Accounting Standard AASB 101 *Presentation of Financial Statements* as amended**

This compiled Standard applies to annual reporting periods beginning on or after 1 July 2008 but before 1 January 2009. It takes into account amendments up to and including 13 December 2007 and was prepared on 7 November 2008 by the staff of the Australian Accounting Standards Board (AASB).

This compilation is not a separate Accounting Standard made by the AASB. Instead, it is a representation of AASB 101 (October 2006) as amended by other Accounting Standards, which are listed in the Table below.

**Table of Standards**

<b>Standard</b>	<b>Date made</b>	<b>Application date (<i>annual reporting periods ... on or after ...</i>)</b>	<b>Application, saving or transitional provisions</b>
AASB 101	4 Oct 2006	( <i>beginning</i> ) 1 Jan 2007	
AASB 2007-6	14 Jun 2007	( <i>beginning</i> ) 1 Jan 2009	not compiled*
Erratum	Jul 2007	( <i>beginning</i> ) 1 Jul 2007	see (a) below
AASB 2007-9	13 Dec 2007	( <i>beginning</i> ) 1 Jul 2008	see (b) below

\* The amendments made by this Standard are not included in this compilation, which presents the principal Standard as applicable to annual reporting periods beginning on or after 1 July 2008 but before 1 January 2009.

- (a) Entities may elect to apply the Erratum amendments to annual reporting periods beginning on or after 1 January 2005 but before 1 July 2007.
- (b) Entities may elect to apply this Standard to annual reporting periods beginning on or after 1 January 2005 but before 1 July 2008 provided that the Standards and Interpretation listed in paragraph 6 of AASB 2007-9 are also applied to that period.

**Table of Amendments**

<b>Paragraph affected</b>	<b>How affected</b>	<b>By ... [paragraph]</b>
Aus14.2	amended	AASB 2007-9 [13]
110	amended	Erratum, Jul 2007 *

\* Accounting Standard AASB 2007-4 *Amendments to Australian Accounting Standards arising from ED 151 and Other Amendments* inserted into AASB Standards the option to use proportionate consolidation for accounting for interests in jointly controlled entities. The Erratum “Proportionate Consolidation” was issued in July 2007 to insert additional references to proportionate consolidation into Standards and Interpretations.

## **COMPARISON WITH IAS 1**

### **AASB 101 and IAS 1**

AASB 101 *Presentation of Financial Statements* as amended incorporates IAS 1 *Presentation of Financial Statements* as issued and amended by the International Accounting Standards Board (IASB). Paragraphs that have been added to this Standard (and do not appear in the text of IAS 1) are identified with the prefix “Aus”, followed by the number of the preceding IASB paragraph and decimal numbering. IAS 1 text that has been deleted from this Standard (and does not affect IFRS compliance) is listed in a separate section after the Standard.

### **Compliance with IAS 1**

Entities that comply with AASB 101 as amended will simultaneously be in compliance with IAS 1 as amended.

## **ACCOUNTING STANDARD AASB 101**

The Australian Accounting Standards Board made Accounting Standard AASB 101 *Presentation of Financial Statements* under section 334 of the *Corporations Act 2001* on 4 October 2006.

This compiled version of AASB 101 applies to annual reporting periods beginning on or after 1 July 2008 but before 1 January 2009. It incorporates relevant amendments contained in other AASB Standards made by the AASB and other decisions of the AASB up to and including 13 December 2007 (see Compilation Details).

## **ACCOUNTING STANDARD AASB 101**

### ***PRESENTATION OF FINANCIAL STATEMENTS***

#### **Objective**

1. The objective of this Standard is to prescribe the basis for presentation of *general purpose financial reports*, to ensure comparability both with the entity's financial reports of previous periods and with the financial reports of other entities. To achieve this objective, this Standard sets out overall requirements for the presentation of financial reports, guidelines for their structure and minimum requirements for their content. The recognition, measurement and disclosure of specific transactions and other events are dealt with in other Australian Accounting Standards.

#### **Application**

**Aus1.1 This Standard applies to:**

- (a) **each *entity* that is required to prepare financial reports in accordance with Part 2M.3 of the Corporations Act;**
- (b) **general purpose financial reports of each reporting entity; and**
- (c) **financial reports that are, or are held out to be, general purpose financial reports.**

- Aus1.2** This Standard applies to *annual reporting periods beginning on or after 1 January 2007*.  
[Note: For application dates of paragraphs changed or added by an amending Standard, see Compilation Details.]
- Aus1.3** This Standard may be applied to *annual reporting periods beginning on or after 1 January 2005 but before 1 January 2007*.
- Aus1.4** The requirements specified in this Standard apply to the financial report where information resulting from their application is *material* in accordance with AASB 1031 *Materiality*.
- Aus1.5 When applicable, this Standard supersedes AASB 101 *Presentation of Financial Statements* as made on 15 July 2004 and amended to 8 September 2005.
- Aus1.6 The term ‘financial statements’ in the title of this Standard means a ‘financial report’.
- Aus1.7** Notwithstanding paragraph Aus1.1(a), the application of paragraphs 124A-124C is limited to each entity that is required to prepare financial reports in accordance with Part 2M.3 of the Corporations Act and that is a reporting entity.
- Aus1.8** Notwithstanding paragraphs Aus1.1 and Aus1.7, a not-for-profit entity need not present the disclosures required by paragraphs 124A-124C.

## Scope

2. [Deleted by the AASB]
3. General purpose financial reports are those intended to meet the needs of users who are not in a position to demand reports tailored to meet their particular information needs. General purpose financial reports include those that are presented separately or within another public document such as an annual report or a prospectus. This Standard does not apply to the structure and content of condensed interim financial reports prepared in accordance with AASB 134 *Interim Financial Reporting*. However, paragraphs 13-41 apply to such financial reports. This Standard applies equally to all entities and whether or not they need to prepare consolidated financial statements or separate financial

statements, as defined in AASB 127 *Consolidated and Separate Financial Statements*.

4. [Deleted by the IASB]
5. This Standard uses terminology that is suitable for profit-oriented entities, including public sector business entities. Entities with not-for-profit activities in the private sector, public sector or government applying this Standard may need to amend the descriptions used for particular line items in the financial statements and for the financial statements themselves.
6. Similarly, entities that do not have equity as defined in AASB 132 *Financial Instruments: Presentation* (e.g. some mutual funds) and entities whose share capital is not equity (e.g. some co-operative entities) may need to adapt the presentation in the financial report of members' or unitholders' interests.

## **Purpose of Financial Reports**

7. Financial reports are a structured representation of the financial position and financial performance of an entity. The objective of general purpose financial reports is to provide information about the financial position, financial performance and cash flows of an entity that is useful to a wide range of users in making economic decisions. Financial reports also show the results of management's stewardship of the resources entrusted to it. To meet this objective, financial reports provide information about an entity's:
  - (a) assets;
  - (b) liabilities;
  - (c) equity;
  - (d) income and expenses, including gains and losses;
  - (e) other changes in equity; and
  - (f) cash flows.

This information, along with other information in the *notes*, assists users of financial reports in predicting the entity's future cash flows and, in particular, their timing and certainty.

## Components of a Financial Report

8. A financial report comprises:
  - (a) a balance sheet;
  - (b) an income statement;
  - (c) a statement of changes in equity showing either:
    - (i) all changes in equity; or
    - (ii) changes in equity other than those arising from transactions with equity holders acting in their capacity as equity holders;
  - (d) a cash flow statement; and
  - (e) notes, comprising a summary of significant accounting policies and other explanatory notes.
9. Many entities present, outside the financial report, a financial review by management that describes and explains the main features of the entity's financial performance and financial position and the principal uncertainties it faces. Such a report may include a review of:
  - (a) the main factors and influences determining financial performance, including changes in the environment in which the entity operates, the entity's response to those changes and their effect, and the entity's policy for investment to maintain and enhance financial performance, including its dividend policy;
  - (b) the entity's sources of funding and its targeted ratio of liabilities to equity; and
  - (c) the entity's resources not recognised in the balance sheet in accordance with Australian Accounting Standards.
10. Many entities also present, outside the financial report, reports and statements such as environmental reports and value added statements, particularly in industries in which environmental factors are significant and when employees are regarded as an important user group. Reports and statements presented outside the financial report are outside the scope of Australian Accounting Standards.

## Definitions

11. The following terms are used in this Standard with the meanings specified.

*Impracticable* – applying a requirement is impracticable when the entity cannot apply it after making every reasonable effort to do so.

*International Financial Reporting Standards (IFRSs)* are Standards and Interpretations adopted by the International Accounting Standards Board (IASB). They comprise:

- (a) International Financial Reporting Standards;
- (b) International Accounting Standards; and
- (c) Interpretations originated by the International Financial Reporting Interpretations Committee (IFRIC) or the former Standing Interpretations Committee (SIC).

*Material* – omissions or misstatements of items are material if they could, individually or collectively, influence the economic decisions of users taken on the basis of the financial report. Materiality depends on the size and nature of the omission or misstatement judged in the surrounding circumstances. The size or nature of the item, or a combination of both, could be the determining factor.

*Notes* contain information in addition to that presented in the balance sheet, income statement, statement of changes in equity and cash flow statement. Notes provide narrative descriptions or disaggregations of items disclosed in those statements and information about items that do not qualify for recognition in those statements.

- Aus11.1 The following terms are also used in this Standard with the meanings specified.

*Annual reporting period* means the financial year or similar period to which an annual financial report relates.

*Australian equivalents to IFRSs* comprise:

- (a) Accounting Standards issued by the Australian Accounting Standards Board (AASB) that are equivalent to Standards issued by the IASB, being AASBs 1 – 99 corresponding to the IFRS series and AASBs 101 – 199 corresponding to the IAS series; and
- (b) Interpretations issued by the AASB corresponding to the Interpretations adopted by the IASB, as listed in AASB 1048 *Interpretation and Application of Standards*.

*Entity* means any legal, administrative, or fiduciary arrangement, organisational structure or other party (including a person) having the capacity to deploy scarce resources in order to achieve objectives.

*General purpose financial report* means a financial report intended to meet the information needs common to users who are unable to command the preparation of reports tailored so as to satisfy, specifically, all of their information needs.

*Related practice* means in relation to the auditor's practice:

- (a) an entity through which an auditor provides professional services to clients and that has one or more partners or directors in common with the auditor's practice; or
- (b) an entity that is owned by the relatives of one or more partners of the auditor's practice and that shares fees or profits with the auditor's practice in respect of the entity that is subject to the financial reporting obligation; or
- (c) any other entity that shares fees or profits with the auditor's practice in respect of the entity that is subject to the financial reporting obligation.

*Special purpose financial report* means a financial report other than a general purpose financial report.

12. Assessing whether an omission or misstatement could influence economic decisions of users, and so be material, requires consideration of the characteristics of those users. The *Framework for the Preparation and Presentation of Financial Statements* (the *Framework*) states in paragraph 25 that “users are assumed to have a reasonable knowledge of business and economic activities and accounting and a willingness to study the information with reasonable diligence”. Therefore, the assessment needs to take into account how users with such attributes could reasonably be expected to be influenced in making economic decisions.

## Overall Considerations

### Fair Presentation and Compliance with Australian Accounting Standards

13. **A financial report shall present fairly the financial position, financial performance and cash flows of an entity. Fair presentation requires the faithful representation of the effects of transactions, other events and conditions in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses set out in the *Framework*. The application of Australian Accounting Standards, with additional disclosure when necessary, is presumed to result in a financial report that achieves a fair presentation.**
- Aus13.1 **The Corporations Act requires an entity’s financial report to comply with Australian Accounting Standards and, if necessary to give a true and fair view, further information to be disclosed in the notes.**
- Aus13.2 **An entity shall disclose in the notes a statement whether the financial report has been prepared in accordance with Australian Accounting Standards.**
- Aus13.3 The financial reporting framework applied in the preparation of the financial report is identified in the summary of accounting policies so that users understand the basis on which the financial report has been prepared. In addition to stating whether the financial report has been prepared in accordance with Australian Accounting Standards, it may also be appropriate to indicate the relevant statutory and other requirements adopted in the preparation of the financial report.

- Aus13.4** An entity shall disclose in the notes a statement that the financial report is a general purpose financial report, or if applicable, a *special purpose financial report*.
- 14.** An entity whose financial statements and notes comply with *IFRSs* shall make an explicit and unreserved statement of such compliance in the notes. The financial statements and notes shall not be described as complying with *IFRSs* unless they comply with all the requirements of *IFRSs*.
- Aus14.1** Where an entity can make the explicit and unreserved statement of compliance in respect of only:
- (a) the parent financial statements and notes; or
  - (b) the consolidated financial statements and notes;
- the entity shall make the explicit and unreserved statement of compliance in accordance with paragraph 14 and clearly identify to which financial statements and notes it relates.**
- Aus14.2** Compliance with *Australian equivalents to IFRSs* by for-profit entities will not necessarily lead to compliance with *IFRSs*. This circumstance arises when the entity is a for-profit government department to which particular Standards apply, such as AASB 1004 *Contributions*, and to which Aus paragraphs in various other Australian Accounting Standards apply. Those requirements override the requirements in an Australian equivalent to *IFRSs* that would otherwise apply.
- Aus14.3** Not-for-profit entities need not comply with the paragraph 14 requirement to make an explicit and unreserved statement of compliance with *IFRSs*.
- 15.** A fair presentation requires an entity:
- (a) to select and apply accounting policies in accordance with AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors*. AASB 108 sets out a hierarchy of authoritative guidance that management considers in the absence of an Australian Accounting Standard that specifically applies to an item;
  - (b) to present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information; and

- (c) to provide additional disclosures when compliance with the specific requirements in Australian Accounting Standards is insufficient to enable users to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance.

16. **Inappropriate accounting policies are not rectified either by disclosure of the accounting policies used or by notes or explanatory material.**
17. [Deleted by the AASB]
18. [Deleted by the AASB]
19. [Deleted by the AASB]
20. [Deleted by the AASB]
21. **In the extremely rare circumstances in which management concludes that compliance with a requirement in an Australian Accounting Standard would be so misleading that it would conflict with the objective of financial reports set out in the *Framework*, the entity shall, to the maximum extent possible, reduce the perceived misleading aspects of compliance by disclosing:**
  - (a) **the title of the Australian Accounting Standard in question, the nature of the requirement, and the reason why management has concluded that complying with that requirement is so misleading in the circumstances that it conflicts with the objective of financial reports set out in the *Framework*; and**
  - (b) **for each period presented, the adjustments to each item in the financial reports that management has concluded would be necessary to achieve a fair presentation.**
22. For the purpose of paragraph 21, an item of information would conflict with the objective of financial reports when it does not represent faithfully the transactions, other events and conditions that it either purports to represent or could reasonably be expected to represent and, consequently, it would be likely to influence economic decisions made by users of financial reports. When assessing whether complying with a specific requirement in an Australian Accounting Standard would be so misleading that it would conflict with the objective of financial reports set out in the *Framework*, management considers:

- (a) why the objective of financial reports is not achieved in the particular circumstances; and
- (b) how the entity's circumstances differ from those of other entities that comply with the requirement. If other entities in similar circumstances comply with the requirement, there is a rebuttable presumption that the entity's compliance with the requirement would not be so misleading that it would conflict with the objective of financial reports set out in the *Framework*.

### **Going Concern**

- 23. When preparing financial reports, management shall make an assessment of an entity's ability to continue as a going concern. Financial reports shall be prepared on a going concern basis unless management either intends to liquidate the entity or to cease trading, or has no realistic alternative but to do so. When management is aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the entity's ability to continue as a going concern, those uncertainties shall be disclosed. When the financial report is not prepared on a going concern basis, that fact shall be disclosed, together with the basis on which the financial report is prepared and the reason why the entity is not regarded as a going concern.**
24. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the reporting date. The degree of consideration depends on the facts in each case. When an entity has a history of profitable operations and ready access to financial resources, a conclusion that the going concern basis of accounting is appropriate may be reached without detailed analysis. In other cases, management may need to consider a wide range of factors relating to current and expected profitability, debt repayment schedules and potential sources of replacement financing before it can satisfy itself that the going concern basis is appropriate.

### **Accrual Basis of Accounting**

- 25. An entity shall prepare its financial report, except for cash flow information, using the accrual basis of accounting.**
26. When the accrual basis of accounting is used, items are recognised as assets, liabilities, equity, income and expenses (the elements of

financial statements) when they satisfy the definitions and recognition criteria for those elements in the *Framework*.

### **Consistency of Presentation**

27. **The presentation and classification of items in the financial report shall be retained from one period to the next unless:**
- (a) **it is apparent, following a significant change in the nature of the entity's operations or a review of its financial report, that another presentation or classification would be more appropriate having regard to the criteria for the selection and application of accounting policies in AASB 108; or**
  - (b) **an Australian Accounting Standard requires a change in presentation.**
28. A significant acquisition or disposal, or a review of the presentation of the financial report, might suggest that the financial report needs to be presented differently. An entity changes the presentation of its financial report only if the changed presentation provides information that is reliable and is more relevant to users of the financial report and the revised structure is likely to continue, so that comparability is not impaired. When making such changes in presentation, an entity reclassifies its comparative information in accordance with paragraphs 38 and 39.

### **Materiality and Aggregation**

29. **Each material class of similar items shall be presented separately in the financial report. Items of a dissimilar nature or function shall be presented separately unless they are immaterial.**
30. Financial reports result from processing large numbers of transactions or other events that are aggregated into classes according to their nature or function. The final stage in the process of aggregation and classification is the presentation of condensed and classified data, which form line items on the face of the balance sheet, income statement, statement of changes in equity and cash flow statement, or in the notes. If a line item is not individually material, it is aggregated with other items either on the face of those statements or in the notes. An item that is not sufficiently material to warrant separate presentation on the face of those statements may nevertheless be sufficiently material for it to be presented separately in the notes.

31. Applying the concept of materiality means that a specific disclosure requirement in an Australian Accounting Standard need not be satisfied if the information is not material.

### **Offsetting**

32. **Assets and liabilities, and income and expenses, shall not be offset unless required or permitted by an Australian Accounting Standard.**
33. It is important that assets and liabilities, and income and expenses, are reported separately. Offsetting in the income statement or the balance sheet, except when offsetting reflects the substance of the transaction or other event, detracts from the ability of users both to understand the transactions, other events and conditions that have occurred and to assess the entity's future cash flows. Measuring assets net of valuation allowances – for example, obsolescence allowances on inventories and doubtful debts allowances on receivables – is not offsetting.
34. AASB 118 *Revenue* defines revenue and requires it to be measured at the fair value of the consideration received or receivable, taking into account the amount of any trade discounts and volume rebates allowed by the entity. An entity undertakes, in the course of its ordinary activities, other transactions that do not generate revenue but are incidental to the main revenue-generating activities. The results of such transactions are presented, when this presentation reflects the substance of the transaction or other event, by netting any income with related expenses arising on the same transaction. For example:
- (a) gains and losses on the disposal of non-current assets, including investments and operating assets, are reported by deducting from the proceeds on disposal the carrying amount of the asset and related selling expenses; and
  - (b) expenditure related to a provision that is recognised in accordance with AASB 137 *Provisions, Contingent Liabilities and Contingent Assets* and reimbursed under a contractual arrangement with a third party (for example, a supplier's warranty agreement) may be netted against the related reimbursement.
35. In addition, gains and losses arising from a group of similar transactions are reported on a net basis, for example, foreign exchange gains and losses or gains and losses arising on financial instruments held for trading. Such gains and losses are, however, reported separately if they are material.

## Comparative Information

- 36. Except when an Australian Accounting Standard permits or requires otherwise, comparative information shall be disclosed in respect of the previous period for all amounts reported in the financial report. Comparative information shall be included for narrative and descriptive information when it is relevant to an understanding of the current period's financial report.**
37. In some cases, narrative information provided in the financial report for the previous period(s) continues to be relevant in the current period. For example, details of a legal dispute, the outcome of which was uncertain at the last reporting date and is yet to be resolved, are disclosed in the current period. Users benefit from information that the uncertainty existed at the last reporting date, and about the steps that have been taken during the period to resolve the uncertainty.
- 38. When the presentation or classification of items in the financial report is amended, comparative amounts shall be reclassified unless the reclassification is *impracticable*. When comparative amounts are reclassified, an entity shall disclose:**
- (a) **the nature of the reclassification;**
  - (b) **the amount of each item or class of items that is reclassified; and**
  - (c) **the reason for the reclassification.**
- 39. When it is impracticable to reclassify comparative amounts, an entity shall disclose:**
- (a) **the reason for not reclassifying the amounts; and**
  - (b) **the nature of the adjustments that would have been made if the amounts had been reclassified.**
40. Enhancing the inter-period comparability of information assists users in making economic decisions, especially by allowing the assessment of trends in financial information for predictive purposes. In some circumstances, it is impracticable to reclassify comparative information for a particular prior period to achieve comparability with the current period. For example, data may not have been collected in the prior period(s) in a way that allows reclassification, and it may not be practicable to recreate the information.

41. AASB 108 deals with the adjustments to comparative information required when an entity changes an accounting policy or corrects an error.

## Structure and Content

### Introduction

42. This Standard requires particular disclosures on the face of the balance sheet, income statement and statement of changes in equity and requires disclosure of other line items either on the face of those statements or in the notes. AASB 107 *Cash Flow Statements* sets out requirements for the presentation of a cash flow statement.
43. This Standard sometimes uses the term ‘disclosure’ in a broad sense, encompassing items presented on the face of the balance sheet, income statement, statement of changes in equity and cash flow statement, as well as in the notes. Disclosures are also required by other Australian Accounting Standards. Unless specified to the contrary elsewhere in this Standard, or in another Australian Accounting Standard, such disclosures are made either on the face of the balance sheet, income statement, statement of changes in equity or cash flow statement (whichever is relevant), or in the notes.

### Identification of the Financial Report

- 44. The financial report shall be identified clearly and distinguished from other information in the same published document.**
45. Australian Accounting Standards apply only to financial reports, and not to other information presented in an annual report or other document. Therefore, it is important that users can distinguish information that is prepared using Australian Accounting Standards from other information that may be useful to users but is not the subject of those requirements.

**Aus45.1 The financial report shall be presented in the English language.**

- 46. Each component of the financial report shall be identified clearly. In addition, the following information shall be displayed prominently, and repeated when it is necessary for a proper understanding of the information presented:**

- (a) **the name of the entity that is reporting or other means of identification, and any change in that information from the preceding reporting date;**
  - (b) **whether the financial report covers the individual entity or a group of entities;**
  - (c) **the reporting date or the period covered by the financial report, whichever is appropriate to that component of the financial report;**
  - (d) **the presentation currency, as defined in AASB 121 *The Effects of Changes in Foreign Exchange Rates*; and**
  - (e) **the level of rounding used in presenting amounts in the financial report.**
47. The requirements in paragraph 46 are normally met by presenting page headings and abbreviated column headings on each page of the financial report. Judgement is required in determining the best way of presenting such information. For example, when the financial report is presented electronically, separate pages are not always used; the above items are then presented frequently enough to ensure a proper understanding of the information included in the financial report.
48. Financial reports are often made more understandable by presenting information in thousands or millions of units of the presentation currency. This is acceptable as long as the level of rounding in presentation is disclosed and material information is not omitted.

### **Reporting Period**

49. **Financial reports shall be presented at least annually. When an entity's reporting date changes and the annual financial report is presented for a period longer or shorter than one year, an entity shall disclose, in addition to the period covered by the financial report:**
- (a) **the reason for using a longer or shorter period; and**
  - (b) **the fact that comparative amounts for the income statement, statement of changes in equity, cash flow statement and related notes are not entirely comparable.**
50. Normally, financial reports are consistently prepared covering a one-year period. However, for practical reasons, some entities prefer to report, for example, for a 52-week period. This Standard does not

preclude this practice, because the resulting financial report is unlikely to be materially different from those that would be presented for one year.

## **Balance Sheet**

### **Current/Non-current Distinction**

- 51. An entity shall present current and non-current assets, and current and non-current liabilities, as separate classifications on the face of its balance sheet in accordance with paragraphs 57-67 except when a presentation based on liquidity provides information that is reliable and is more relevant. When that exception applies, all assets and liabilities shall be presented broadly in order of liquidity.**
- 52. Whichever method of presentation is adopted, for each asset and liability line item that combines amounts expected to be recovered or settled (a) no more than twelve months after the reporting date, and (b) more than twelve months after the reporting date, an entity shall disclose the amount expected to be recovered or settled after more than twelve months.**
53. When an entity supplies goods or services within a clearly identifiable operating cycle, separate classification of current and non-current assets and liabilities on the face of the balance sheet provides useful information by distinguishing the net assets that are continuously circulating as working capital from those used in the entity's long-term operations. It also highlights assets that are expected to be realised within the current operating cycle, and liabilities that are due for settlement within the same period.
54. For some entities, such as financial institutions, a presentation of assets and liabilities in increasing or decreasing order of liquidity provides information that is reliable and is more relevant than a current/non-current presentation because the entity does not supply goods or services within a clearly identifiable operating cycle.
55. In applying paragraph 51, an entity is permitted to present some of its assets and liabilities using a current/non-current classification and others in order of liquidity when this provides information that is reliable and is more relevant. The need for a mixed basis of presentation might arise when an entity has diverse operations.
56. Information about expected dates of realisation of assets and liabilities is useful in assessing the liquidity and solvency of an entity. AASB 7 *Financial Instruments: Disclosures* requires disclosure of the maturity

dates of financial assets and financial liabilities. Financial assets include trade and other receivables, and financial liabilities include trade and other payables. Information on the expected date of recovery and settlement of non-monetary assets and liabilities such as inventories and provisions is also useful, whether or not assets and liabilities are classified as current or non-current. For example, an entity discloses the amount of inventories that are expected to be recovered more than twelve months after the reporting date.

### **Current Assets**

**57. An asset shall be classified as current when it satisfies any of the following criteria:**

- (a) it is expected to be realised in, or is intended for sale or consumption in, the entity's normal operating cycle;**
- (b) it is held primarily for the purpose of being traded;**
- (c) it is expected to be realised within twelve months after the reporting date; or**
- (d) it is cash or a cash equivalent (as defined in AASB 107) unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.**

**All other assets shall be classified as non-current.**

58. This Standard uses the term 'non-current' to include tangible, intangible and financial assets of a long-term nature. It does not prohibit the use of alternative descriptions as long as the meaning is clear.
59. The operating cycle of an entity is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. When the entity's normal operating cycle is not clearly identifiable, its duration is assumed to be twelve months. Current assets include assets (such as inventories and trade receivables) that are sold, consumed or realised as part of the normal operating cycle even when they are not expected to be realised within twelve months after the reporting date. Current assets also include assets held primarily for the purpose of being traded (financial assets within this category are classified as held for trading in accordance with AASB 139 *Financial Instruments: Recognition and Measurement*) and the current portion of non-current financial assets.

### **Current Liabilities**

- 60. A liability shall be classified as current when it satisfies any of the following criteria:**
- (a) it is expected to be settled in the entity's normal operating cycle;**
  - (b) it is held primarily for the purpose of being traded;**
  - (c) it is due to be settled within twelve months after the reporting date; or**
  - (d) the entity does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date.**

**All other liabilities shall be classified as non-current.**

61. Some current liabilities, such as trade payables and some accruals for employee and other operating costs, are part of the working capital used in the entity's normal operating cycle. Such operating items are classified as current liabilities even if they are due to be settled more than twelve months after the reporting date. The same normal operating cycle applies to the classification of an entity's assets and liabilities. When the entity's normal operating cycle is not clearly identifiable, its duration is assumed to be twelve months.
62. Other current liabilities are not settled as part of the normal operating cycle, but are due for settlement within twelve months after the reporting date or held primarily for the purpose of being traded. Examples are financial liabilities classified as held for trading in accordance with AASB 139, bank overdrafts, and the current portion of non-current financial liabilities, dividends payable, income taxes and other non-trade payables. Financial liabilities that provide financing on a long-term basis (i.e. are not part of the working capital used in the entity's normal operating cycle) and are not due for settlement within twelve months after the reporting date are non-current liabilities, subject to paragraphs 65 and 66.
63. An entity classifies its financial liabilities as current when they are due to be settled within twelve months after the reporting date, even if:
- (a) the original term was for a period longer than twelve months; and

- (b) an agreement to refinance, or to reschedule payments, on a long-term basis is completed after the reporting date and before the financial report is authorised for issue.
64. If an entity expects, and has the discretion, to refinance or roll over an obligation for at least twelve months after the reporting date under an existing loan facility, it classifies the obligation as non-current, even if it would otherwise be due within a shorter period. However, when refinancing or rolling over the obligation is not at the discretion of the entity (for example, there is no agreement to refinance), the potential to refinance is not considered and the obligation is classified as current.
65. When an entity breaches an undertaking under a long-term loan agreement on or before the reporting date with the effect that the liability becomes payable on demand, the liability is classified as current, even if the lender has agreed, after the reporting date and before the authorisation of the financial report for issue, not to demand payment as a consequence of the breach. The liability is classified as current because, at the reporting date, the entity does not have an unconditional right to defer its settlement for at least twelve months after that date.
66. However, the liability is classified as non-current if the lender agreed by the reporting date to provide a period of grace ending at least twelve months after the reporting date, within which the entity can rectify the breach and during which the lender cannot demand immediate repayment.
67. In respect of loans classified as current liabilities, if the following events occur between the reporting date and the date the financial report is authorised for issue, those events qualify for disclosure as non-adjusting events in accordance with AASB 110 *Events after the Balance Sheet Date*:
- (a) refinancing on a long-term basis;
  - (b) rectification of a breach of a long-term loan agreement; and
  - (c) the receipt from the lender of a period of grace to rectify a breach of a long-term loan agreement ending at least twelve months after the reporting date.

**Information to be Presented on the Face of the Balance Sheet**

68. **As a minimum, the face of the balance sheet shall include line items that present the following amounts to the extent that they are not presented in accordance with paragraph 68A:**

- (a) property, plant and equipment;
- (b) investment property;
- (c) intangible assets;
- (d) financial assets (excluding amounts shown under (e), (h) and (i));
- (e) investments accounted for using the equity method;
- (f) biological assets;
- (g) inventories;
- (h) trade and other receivables;
- (i) cash and cash equivalents;
- (j) trade and other payables;
- (k) provisions;
- (l) financial liabilities (excluding amounts shown under (j) and (k));
- (m) liabilities and assets for current tax, as defined in AASB 112 *Income Taxes*;
- (n) deferred tax liabilities and deferred tax assets, as defined in AASB 112;
- (o) minority interest, presented within equity; and
- (p) issued capital and reserves attributable to equity holders of the parent.

**68A.** The face of the balance sheet shall also include line items that present the following amounts:

- (a) the total of assets classified as held for sale and assets included in disposal groups classified as held for sale in accordance with AASB 5 *Non-current Assets Held for Sale and Discontinued Operations*; and
- (b) liabilities included in disposal groups classified as held for sale in accordance with AASB 5.

- 69. Additional line items, headings and subtotals shall be presented on the face of the balance sheet when such presentation is relevant to an understanding of the entity's financial position.**
- 70. When an entity presents current and non-current assets, and current and non-current liabilities, as separate classifications on the face of its balance sheet, it shall not classify deferred tax assets (liabilities) as current assets (liabilities).**
71. This Standard does not prescribe the order or format in which items are to be presented. Paragraph 68 simply provides a list of items that are sufficiently different in nature or function to warrant separate presentation on the face of the balance sheet. In addition:
- (a) line items are included when the size, nature or function of an item or aggregation of similar items is such that separate presentation is relevant to an understanding of the entity's financial position; and
  - (b) the descriptions used and the ordering of items or aggregation of similar items may be amended according to the nature of the entity and its transactions, to provide information that is relevant to an understanding of the entity's financial position. For example, a financial institution may amend the above descriptions to provide information that is relevant to the operations of a financial institution.
72. The judgement on whether additional items are presented separately is based on an assessment of:
- (a) the nature and liquidity of assets;
  - (b) the function of assets within the entity; and
  - (c) the amounts, nature and timing of liabilities.
73. The use of different measurement bases for different classes of assets suggests that their nature or function differs and, therefore, that they should be presented as separate line items. For example, different classes of property, plant and equipment can be carried at cost or revalued amounts in accordance with AASB 116 *Property, Plant and Equipment*.

**Information to be Presented either on the Face of the Balance Sheet or in the Notes**

- 74. An entity shall disclose, either on the face of the balance sheet or in the notes, further subclassifications of the line items presented, classified in a manner appropriate to the entity's operations.**
75. The detail provided in subclassifications depends on the requirements of Australian Accounting Standards and on the size, nature and function of the amounts involved. The factors set out in paragraph 72 also are used to decide the basis of subclassification. The disclosures vary for each item, for example:
- (a) items of property, plant and equipment are disaggregated into classes in accordance with AASB 116;
  - (b) receivables are disaggregated into amounts receivable from trade customers, receivables from related parties, prepayments and other amounts;
  - (c) inventories are subclassified, in accordance with AASB 102 *Inventories*, into classifications such as merchandise, production supplies, materials, work in progress and finished goods;
  - (d) provisions are disaggregated into provisions for employee benefits and other items; and
  - (e) contributed equity and reserves are disaggregated into various classes, such as paid-in capital, share premium and reserves.
- 76. An entity shall disclose the following, either on the face of the balance sheet or in the notes:**
- (a) for each class of share capital:**
    - (i) the number of shares authorised;**
    - (ii) the number of shares issued and fully paid, and issued but not fully paid;**
    - (iii) par value per share, or that the shares have no par value;**
    - (iv) a reconciliation of the number of shares outstanding at the beginning and at the end of the period;**

- (v) **the rights, preferences and restrictions attaching to that class including restrictions on the distribution of dividends and the repayment of capital;**
  - (vi) **shares in the entity held by the entity or by its subsidiaries or associates; and**
  - (vii) **shares reserved for issue under options and contracts for the sale of shares, including the terms and amounts; and**
- (b) **a description of the nature and purpose of each reserve within equity.**

**77. An entity without share capital, such as a partnership or trust, shall disclose information equivalent to that required by paragraph 76(a), showing changes during the period in each category of equity interest, and the rights, preferences and restrictions attaching to each category of equity interest.**

## **Income Statement**

### **Profit or Loss for the Period**

- 78. All items of income and expense recognised in a period shall be included in profit or loss unless an Australian Accounting Standard requires otherwise.**
79. Normally, all items of income and expense recognised in a period are included in profit or loss. This includes the effects of changes in accounting estimates. However, circumstances may exist when particular items may be excluded from profit or loss for the current period. AASB 108 deals with two such circumstances: the correction of errors and the effect of changes in accounting policies.
80. Other Australian Accounting Standards deal with items that may meet the *Framework* definitions of income or expense but are usually excluded from profit or loss. Examples include revaluation reserves (see AASB 116), particular gains and losses arising on translating the financial statements of a foreign operation (see AASB 121) and gains or losses on remeasuring available-for-sale financial assets (see AASB 139).

### **Information to be Presented on the Face of the Income Statement**

- 81. As a minimum, the face of the income statement shall include line items that present the following amounts for the period:**
- (a) revenue;**
  - (b) finance costs;**
  - (c) share of the profit or loss of associates and joint ventures accounted for using the equity method;**
  - (d) tax expense;**
  - (e) a single amount comprising of (i) the post-tax profit or loss of discontinued operations and (ii) the post-tax gain or loss recognised on the measurement to fair value less costs to sell or on the disposal of the assets or disposal group(s) constituting the discontinued operation; and**
  - (f) profit or loss.**
- 82. The following items shall be disclosed on the face of the income statement as allocations of profit or loss for the period:**
- (a) profit or loss attributable to minority interest; and**
  - (b) profit or loss attributable to equity holders of the parent.**
- 83. Additional line items, headings and subtotals shall be presented on the face of the income statement when such presentation is relevant to an understanding of the entity's financial performance.**
- 84.** Because the effects of an entity's various activities, transactions and other events differ in frequency, potential for gain or loss and predictability, disclosing the components of financial performance assists in an understanding of the financial performance achieved and in making projections of future results. Additional line items are included on the face of the income statement, and the descriptions used and the ordering of items are amended when this is necessary to explain the elements of financial performance. Factors to be considered include materiality and the nature and function of the components of income and expenses. For example, a financial institution may amend the descriptions to provide information that is relevant to the operations of a financial institution. Income and expense items are not offset unless the criteria in paragraph 32 are met.

85. **An entity shall not present any items of income and expense as extraordinary items, either on the face of the income statement or in the notes.**

**Information to be Presented either on the Face of the Income Statement or in the Notes**

86. **When items of income and expense are material, their nature and amount shall be disclosed separately.**
87. Circumstances that would give rise to the separate disclosure of items of income and expense include:
- (a) write-downs of inventories to net realisable value or of property, plant and equipment to recoverable amount, as well as reversals of such write-downs;
  - (b) restructurings of the activities of an entity and reversals of any provisions for the costs of restructuring;
  - (c) disposals of items of property, plant and equipment;
  - (d) disposals of investments;
  - (e) discontinued operations;
  - (f) litigation settlements; and
  - (g) other reversals of provisions.
88. **An entity shall present an analysis of expenses using a classification based on either the nature of expenses or their function within the entity, whichever provides information that is reliable and more relevant.**
89. Entities are encouraged to present the analysis in paragraph 88 on the face of the income statement.
90. Expenses are subclassified to highlight components of financial performance that may differ in terms of frequency, potential for gain or loss and predictability. This analysis is provided in one of two forms.
91. The first form of analysis is the nature of expense method. Expenses are aggregated in the income statement according to their nature (for example, depreciation, purchases of materials, transport costs, employee benefits and advertising costs), and are not reallocated among various functions within the entity. This method may be simple

to apply because no allocations of expenses to functional classifications are necessary. An example of a classification using the nature of expense method is as follows:

Revenue	X
Other income	X
Changes in inventories of finished goods and work in progress	X
Raw materials and consumables used	X
Employee benefits expense	X
Depreciation and amortisation expense	X
Other expenses	X
Total expenses	<u>(X)</u>
Profit before income tax	<u><u>X</u></u>

92. The second form of analysis is the function of expense or 'cost of sales' method and classifies expenses according to their function as part of cost of sales or, for example, the costs of distribution or administrative activities. At a minimum, an entity discloses its cost of sales under this method separately from other expenses. This method can provide more relevant information to users than the classification of expenses by nature, but allocating costs to functions may require arbitrary allocations and involve considerable judgement. An example of a classification using the function of expense method is as follows:

Revenue	X
Cost of sales	<u>(X)</u>
Gross profit	X
Other income	X
Distribution costs	(X)
Administrative expenses	(X)
Other expenses	<u>(X)</u>
Profit before income tax	<u><u>X</u></u>

- 93. Entities classifying expenses by function shall disclose additional information on the nature of expenses, including depreciation and amortisation expense and employee benefits expense.**

94. The choice between the function of expense method and the nature of expense method depends on historical and industry factors and the nature of the entity. Both methods provide an indication of those costs that might vary, directly or indirectly, with the level of sales or production of the entity. Because each method of presentation has

merit for different types of entities, this Standard requires management to select the most relevant and reliable presentation. However, because information on the nature of expenses is useful in predicting future cash flows, additional disclosure is required when the function of expense classification is used. In paragraph 93, ‘employee benefits’ has the same meaning as in AASB 119 *Employee Benefits*.

95. **An entity shall disclose, either on the face of the income statement or the statement of changes in equity, or in the notes, the amount of dividends recognised as distributions to equity holders during the period, and the related amount per share.**

### **Statement of Changes in Equity**

96. **An entity shall present a statement of changes in equity showing on the face of the statement:**
- (a) **profit or loss for the period;**
  - (b) **each item of income and expense for the period that, as required by other Australian Accounting Standards, is recognised directly in equity, and the total of these items;**
  - (c) **total income and expense for the period (calculated as the sum of (a) and (b)), showing separately the total amounts attributable to equity holders of the parent and to minority interest; and**
  - (d) **for each component of equity, the effects of changes in accounting policies and corrections of errors recognised in accordance with AASB 108.**

**A statement of changes in equity that comprises only these items shall be titled a statement of recognised income and expense.**

97. **An entity shall also present, either on the face of the statement of changes in equity or in the notes:**
- (a) **the amounts of transactions with equity holders acting in their capacity as equity holders, showing separately distributions to equity holders;**
  - (b) **the balance of retained earnings (i.e. accumulated profit or loss) at the beginning of the period and at the reporting date, and the changes during the period; and**

**(c) a reconciliation between the carrying amount of each class of contributed equity and each reserve at the beginning and the end of the period, separately disclosing each change.**

98. Changes in an entity's equity between two reporting dates reflect the increase or decrease in its net assets during the period. Except for changes resulting from transactions with equity holders acting in their capacity as equity holders (such as equity contributions, reacquisitions of the entity's own equity instruments and dividends) and transaction costs directly related to such transactions, the overall change in equity during a period represents the total amount of income and expenses, including gains and losses, generated by the entity's activities during that period (whether those items of income and expenses are recognised in profit or loss or directly as changes in equity).
99. This Standard requires all items of income and expense recognised in a period to be included in profit or loss unless another Australian Accounting Standard requires otherwise. Other Australian Accounting Standards require some gains and losses (such as revaluation increases and decreases, particular foreign exchange differences, gains or losses on remeasuring available-for-sale financial assets, and related amounts of current tax and deferred tax) to be recognised directly as changes in equity. Because it is important to consider all items of income and expense in assessing changes in an entity's financial position between two reporting dates, this Standard requires the presentation of a statement of changes in equity that highlights an entity's total income and expenses, including those that are recognised directly in equity.
100. AASB 108 requires retrospective adjustments to effect changes in accounting policies, to the extent practicable, except when the transitional provisions in another Australian Accounting Standard require otherwise. AASB 108 also requires that restatements to correct errors are made retrospectively, to the extent practicable. Retrospective adjustments and retrospective restatements are made to the balance of retained earnings, except when an Australian Accounting Standard requires retrospective adjustment of another component of equity. Paragraph 96(d) requires disclosure in the statement of changes in equity of the total adjustment to each component of equity resulting, separately, from changes in accounting policies and from corrections of errors. These adjustments are disclosed for each prior period and the beginning of the period.
101. The requirements in paragraphs 96 and 97 may be met in various ways. One example is a columnar format that reconciles the opening and closing balances of each element within equity. An alternative is to present only the items set out in paragraph 96 in the statement of

changes in equity. Under this approach, the items described in paragraph 97 are shown in the notes.

## **Cash Flow Statement**

102. Cash flow information provides users of financial reports with a basis to assess the ability of the entity to generate cash and cash equivalents and the needs of the entity to utilise those cash flows. AASB 107 sets out requirements for the presentation of the cash flow statement and related disclosures.

## **Notes**

### **Structure**

103. **The notes shall:**

- (a) **present information about the basis of preparation of the financial report and the specific accounting policies used in accordance with paragraphs 108-115;**
- (b) **disclose the information required by Australian Accounting Standards that is not presented on the face of the balance sheet, income statement, statement of changes in equity or cash flow statement; and**
- (c) **provide additional information that is not presented on the face of the balance sheet, income statement, statement of changes in equity or cash flow statement, but is relevant to an understanding of any of them.**

104. **Notes shall, as far as practicable, be presented in a systematic manner. Each item on the face of the balance sheet, income statement, statement of changes in equity and cash flow statement shall be cross referenced to any related information in the notes.**

105. Notes are normally presented in the following order, which assists users in understanding the financial report and comparing them with financial reports of other entities:

- (a) a statement of compliance with IFRSs (see paragraph 14);
- (b) a summary of significant accounting policies applied (see paragraph 108);

- (c) supporting information for items presented on the face of the balance sheet, income statement, statement of changes in equity and cash flow statement, in the order in which each statement and each line item is presented; and
- (d) other disclosures, including:
  - (i) contingent liabilities (see AASB 137) and unrecognised contractual commitments; and
  - (ii) non-financial disclosures, for example the entity's financial risk management objectives and policies (see AASB 7).

106. In some circumstances, it may be necessary or desirable to vary the ordering of specific items within the notes. For example, information on changes in fair value recognised in profit or loss may be combined with information on maturities of financial instruments, although the former disclosures relate to the income statement and the latter relate to the balance sheet. Nevertheless, a systematic structure for the notes is retained as far as practicable.
107. Notes providing information about the basis of preparation of the financial report and specific accounting policies may be presented as a separate component of the financial report.

#### **Disclosure of Accounting Policies**

**108. An entity shall disclose in the summary of significant accounting policies:**

- (a) the measurement basis (or bases) used in preparing the financial report; and**
- (b) the other accounting policies used that are relevant to an understanding of the financial report.**

109. It is important for users to be informed of the measurement basis or bases used in the financial report (for example, historical cost, current cost, net realisable value, fair value or recoverable amount) because the basis on which the financial report is prepared significantly affects their analysis. When more than one measurement basis is used in the financial report, for example when particular classes of assets are revalued, it is sufficient to provide an indication of the categories of assets and liabilities to which each measurement basis is applied.

110. In deciding whether a particular accounting policy should be disclosed, management considers whether disclosure would assist users in understanding how transactions, other events and conditions are reflected in the reported financial performance and financial position. Disclosure of particular accounting policies is especially useful to users when those policies are selected from alternatives allowed in Australian Accounting Standards. An example is disclosure of whether a venturer recognises its interest in a jointly controlled entity using proportionate consolidation or the equity method (see AASB 131 *Interests in Joint Ventures*). Some Australian Accounting Standards specifically require disclosure of particular accounting policies, including choices made by management between different policies they allow. For example, AASB 116 requires disclosure of the measurement bases used for classes of property, plant and equipment. AASB 123 *Borrowing Costs* requires disclosure of whether borrowing costs are recognised immediately as an expense or capitalised as part of the cost of qualifying assets.
111. Each entity considers the nature of its operations and the policies that the users of its financial report would expect to be disclosed for that type of entity. For example, an entity subject to income taxes would be expected to disclose its accounting policies for income taxes, including those applicable to deferred tax liabilities and assets. When an entity has significant foreign operations or transactions in foreign currencies, disclosure of accounting policies for the recognition of foreign exchange gains and losses would be expected. When business combinations have occurred, the policies used for measuring goodwill and minority interest are disclosed.
112. An accounting policy may be significant because of the nature of the entity's operations even if amounts for current and prior periods are not material. It is also appropriate to disclose each significant accounting policy that is not specifically required by Australian Accounting Standards, but is selected and applied in accordance with AASB 108.
- 113. An entity shall disclose, in the summary of significant accounting policies or other notes, the judgements, apart from those involving estimations (see paragraph 116), that management has made in the process of applying the entity's accounting policies and that have the most significant effect on the amounts recognised in the financial report.**
114. In the process of applying the entity's accounting policies, management makes various judgements, apart from those involving estimations, that can significantly affect the amounts recognised in the

financial report. For example, management makes judgements in determining:

- (a) whether financial assets are held-to-maturity investments;
- (b) when substantially all the significant risks and rewards of ownership of financial assets and lease assets are transferred to other entities;
- (c) whether, in substance, particular sales of goods are financing arrangements and therefore do not give rise to revenue; and
- (d) whether the substance of the relationship between the entity and a special purpose entity indicates that the special purpose entity is controlled by the entity.

115. Some of the disclosures made in accordance with paragraph 113 are required by other Australian Accounting Standards. For example, AASB 127 requires an entity to disclose the reasons why the entity's ownership interest does not constitute control, in respect of an investee that is not a subsidiary even though more than half of its voting or potential voting power is owned directly or indirectly through subsidiaries. AASB 140 *Investment Property* requires disclosure of the criteria developed by the entity to distinguish investment property from owner-occupied property and from property held for sale in the ordinary course of business, when classification of the property is difficult.

#### **Key Sources of Estimation Uncertainty**

- 116. An entity shall disclose in the notes information about the key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next annual reporting period. In respect of those assets and liabilities, the notes shall include details of:**

- (a) their nature; and**
- (b) their carrying amount as at the reporting date.**

117. Determining the carrying amounts of some assets and liabilities requires estimation of the effects of uncertain future events on those assets and liabilities at the reporting date. For example, in the absence of recently observed market prices used to measure the following assets and liabilities, future-oriented estimates are necessary to

measure the recoverable amount of classes of property, plant and equipment, the effect of technological obsolescence on inventories, provisions subject to the future outcome of litigation in progress, and long-term employee benefit liabilities such as pension obligations. These estimates involve assumptions about such items as the risk adjustment to cash flows or discount rates used, future changes in salaries and future changes in prices affecting other costs.

118. The key assumptions and other key sources of estimation uncertainty disclosed in accordance with paragraph 116 relate to the estimates that require management's most difficult, subjective or complex judgements. As the number of variables and assumptions affecting the possible future resolution of the uncertainties increases, those judgements become more subjective and complex, and the potential for a consequential material adjustment to the carrying amounts of assets and liabilities normally increases accordingly.
119. The disclosures in paragraph 116 are not required for assets and liabilities with a significant risk that their carrying amounts might change materially within the next annual reporting period if, at the reporting date, they are measured at fair value based on recently observed market prices (their fair values might change materially within the next annual reporting period but these changes would not arise from assumptions or other sources of estimation uncertainty at the reporting date).
120. The disclosures in paragraph 116 are presented in a manner that helps users of financial reports to understand the judgements management makes about the future and about other key sources of estimation uncertainty. The nature and extent of the information provided vary according to the nature of the assumption and other circumstances. Examples of the types of disclosures made are:
  - (a) the nature of the assumption or other estimation uncertainty;
  - (b) the sensitivity of carrying amounts to the methods, assumptions and estimates underlying their calculation, including the reasons for the sensitivity;
  - (c) the expected resolution of an uncertainty and the range of reasonably possible outcomes within the next annual reporting period in respect of the carrying amounts of the assets and liabilities affected; and
  - (d) an explanation of changes made to past assumptions concerning those assets and liabilities, if the uncertainty remains unresolved.

121. It is not necessary to disclose budget information or forecasts in making the disclosures in paragraph 116.
122. When it is impracticable to disclose the extent of the possible effects of a key assumption or another key source of estimation uncertainty at the reporting date, the entity discloses that it is reasonably possible, based on existing knowledge, that outcomes within the next annual reporting period that are different from assumptions could require a material adjustment to the carrying amount of the asset or liability affected. In all cases, the entity discloses the nature and carrying amount of the specific asset or liability (or class of assets or liabilities) affected by the assumption.
123. The disclosures in paragraph 113 of particular judgements management made in the process of applying the entity's accounting policies do not relate to the disclosures of key sources of estimation uncertainty in paragraph 116.
124. The disclosure of some of the key assumptions that would otherwise be required in accordance with paragraph 116 is required by other Australian Accounting Standards. For example, AASB 137 requires disclosure, in specified circumstances, of major assumptions concerning future events affecting classes of provisions. AASB 7 requires disclosure of significant assumptions applied in estimating fair values of financial assets and financial liabilities that are carried at fair value. AASB 116 requires disclosure of significant assumptions applied in estimating fair values of revalued items of property, plant and equipment.

## **Capital**

### **124A. An entity shall disclose information that enables users of its financial report to evaluate the entity's objectives, policies and processes for managing capital.**

124B. To comply with paragraph 124A, the entity discloses the following:

- (a) qualitative information about its objectives, policies and processes for managing capital, including (but not limited to):
  - (i) a description of what it manages as capital;
  - (ii) when an entity is subject to externally imposed capital requirements, the nature of those requirements and how those requirements are incorporated into the management of capital; and

- (iii) how it is meeting its objectives for managing capital;
- (b) summary quantitative data about what it manages as capital. Some entities regard some financial liabilities (e.g. some forms of subordinated debt) as part of capital. Other entities regard capital as excluding some components of equity (e.g. components arising from cash flow hedges);
- (c) any changes in (a) and (b) from the previous period;
- (d) whether during the period it complied with any externally imposed capital requirements to which it is subject; and
- (e) when the entity has not complied with such externally imposed capital requirements, the consequences of such non-compliance.

These disclosures shall be based on the information provided internally to the entity's key management personnel.

124C. An entity may manage capital in a number of ways and be subject to a number of different capital requirements. For example, a conglomerate may include entities that undertake insurance activities and banking activities, and those entities may also operate in several jurisdictions. When an aggregate disclosure of capital requirements and how capital is managed would not provide useful information or distorts a financial report user's understanding of an entity's capital resources, the entity shall disclose separate information for each capital requirement to which the entity is subject.

#### **Other Disclosures**

**125. An entity shall disclose in the notes:**

- (a) **the amount of dividends proposed or declared before the financial report was authorised for issue but not recognised as a distribution to equity holders during the period, and the related amount per share; and**
- (b) **the amount of any cumulative preference dividends not recognised.**

**126. An entity shall disclose the following, if not disclosed elsewhere in information published with the financial report:**

- (a) **the domicile and legal form of the entity, its country of incorporation and the address of its registered office (or**

principal place of business, if different from the registered office);

- (b) a description of the nature of the entity's operations and its principal activities; and
- (c) the name of the parent and the ultimate parent of the group.

**Aus126.1** An entity, other than a group, shall disclose in the financial report, the amounts paid or payable to:

- (a) the auditor of the entity for an audit or a review of the financial reports of the entity;
- (b) the auditor of the entity for non-audit services in relation to the entity, disclosing separately the nature and amount of each of the non-audit services provided by the auditor; and
- (c) a *related practice* of the auditor for non-audit services in relation to the entity, disclosing separately the nature and amount of each category of non-audit service.

**Aus126.2** The following information shall be disclosed in the financial report of a group, the amounts paid or payable to:

- (a) the auditor of the parent of the group, for an audit or a review of the financial report of any entity in the group;
- (b) the auditor of the parent of the group, for non-audit services in relation to any entity in the group, disclosing separately the nature and amount of each of the non-audit services provided by the auditor;
- (c) a related practice of the auditor of the parent of the group, for non-audit services in relation to any entity in the group, disclosing separately the nature and amount of each of the non-audit services provided by the auditor;
- (d) the auditors of the subsidiaries in the group, other than those disclosed in accordance with paragraph Aus126.2(a), for an audit or a review of the financial reports of those subsidiaries;

- (e) the auditors of the subsidiaries in the group, other than those disclosed in accordance with paragraphs Aus126.2(b) and (c), for non-audit services in relation to any entity in the group, disclosing separately the nature and amount of each of the non-audit services provided by the auditor; and
- (f) a related practice of the auditors of the subsidiaries in the group, other than those disclosed in accordance with paragraphs Aus126.2(b) and (c), for non-audit services in relation to any entity in the group, disclosing separately the nature and amount of each of the non-audit services provided by the auditor.

**Aus126.3** An entity shall disclose for each class of shares included in equity, where either dividends payable were first recognised as a liability during the reporting period or dividends were paid during the reporting period without previously being recognised as a liability:

- (a) the amount, in aggregate and per share, of those dividends that have been or will be franked and the tax rate at which those dividends have been or will be franked; and
- (b) the amount, in aggregate and per share, of those dividends that have not been or will not be franked.

**Aus126.4** An entity shall disclose the amount of franking credits available for subsequent reporting periods to the equity holders in the entity if it is not a group or the parent in a group, by disclosing the balance of the franking account as at the reporting date, adjusted for:

- (a) franking credits that will arise from the payment of the amount of the provision for income tax;
- (b) franking debits that will arise from the payment of dividends recognised as a liability at the reporting date; and
- (c) franking credits that will arise from the receipt of dividends recognised as receivables at the reporting date.

**Aus126.5** An entity shall disclose in the notes the impact on the franking account of dividends proposed or declared before

**the financial report was authorised for issue but not recognised as a distribution to equity holders during the period.**

**Aus126.6 An entity shall disclose the nature and amount of each individual and each class of capital commitments and of other expenditure commitments contracted for as at the reporting date, other than commitments for the supply of inventories, which have not been recognised as liabilities. The disclosures shall be made in the following time bands, according to the time that is expected to elapse from the reporting date to their expected date of settlement:**

- (a) within twelve months;**
- (b) twelve months or longer and not longer than five years; and**
- (c) longer than five years.**

## **Effective Date of IAS 1**

## **BASIS FOR CONCLUSIONS**

*This Basis for Conclusions accompanies, but is not part of, AASB 101.*

The Australian Accounting Standards Board's reasons for deciding to have the same requirements as IAS 1 *Presentation of Financial Statements* in AASB 101 *Presentation of Financial Statements* in respect of for-profit entities are noted below.

The AASB concluded that, in order to obtain the full benefits of the Australian adoption of International Financial Reporting Standards, it is important that Australian Accounting Standards include the same requirements as IFRSs in respect of for-profit entities.

The AASB considers that any Australian differences from IFRSs have the potential to result in different outcomes from those that could be achieved under IFRSs.

In making its decision, the AASB noted that there are inevitably certain costs associated with the removal of Australian differences. For example, the level of comparability in financial reporting in Australia may be diminished by the removal of the encouragements to use certain financial statement formats that were outlined by the AASB in an Appendix to the previous version of this Standard. Nevertheless, the AASB is satisfied that the principle of having the same requirements as IFRSs for for-profit entities is in Australia's best interest and that any associated costs will be exceeded by the potential benefits of consistency between Australian financial reporting requirements and financial reporting under IFRSs elsewhere in the world.

## AUSTRALIAN IMPLEMENTATION GUIDANCE

*Australian implementation guidance accompanies, but is not part of, AASB 101. The following example illustrates the application of the disclosure requirements in paragraphs Aus126.3 to Aus126.5 of the Standard, which relate to dividend and franking details. The example does not illustrate all possible circumstances. The illustrative example is not intended to be a template or model and is therefore not exhaustive.*

### Example Note – Dividends Paid or Provided For on Ordinary Shares

	Consolidated		Parent	
	20X2	20X1	20X2	20X1
(i) Dividends Paid or Provided For	\$'000	\$'000	\$'000	\$'000
<b>Dividends paid or provided for during the reporting period</b>				
Current year interim				
Franked dividends	X	X	X	X
Previous year final				
Franked dividends	<u>X</u>	<u>X</u>	<u>X</u>	<u>X</u>
	<u>X</u>	<u>X</u>	<u>X</u>	<u>X</u>
<b>Dividends proposed and not recognised as a liability</b>				
Current year final				
Franked dividends	<u>X</u>	<u>X</u>	<u>X</u>	<u>X</u>
<b>(ii) Dividends Per Share</b>				
<b>Dividends paid or provided for during the reporting period</b>				
Current year interim				
Franked dividends – cents per share	X	X	X	X
Previous year final				
Franked dividends – cents per share	<u>X</u>	<u>X</u>	<u>X</u>	<u>X</u>
	<u>X</u>	<u>X</u>	<u>X</u>	<u>X</u>
<b>Dividends proposed and not recognised as a liability</b>				
Current year final				
Franked dividends – cents per share	<u>X</u>	<u>X</u>	<u>X</u>	<u>X</u>

<b>(iii) Franking Account Balance</b>	<b>Parent</b>	
	<b>20X2</b>	<b>20X1</b>
	<b>\$'000</b>	<b>\$'000</b>
Franking credits available for subsequent annual reporting periods:		
– franking account balance as at the reporting date at 30% (20X1: 30%)	X	X
– franking credits that will arise from the payment of income tax payable as at the reporting date	X	X
– franking debits that will arise from the payment of dividends recognised as a liability at the reporting date	–	–
– franking credits that will arise from the receipt of dividends recognised as receivables at the reporting date	<u>X</u>	<u>X</u>
Franking credits available for future reporting periods	X	X
– franking debits that will arise from the payment of dividends proposed or declared before the financial report was authorised for issue but not recognised as a distribution to equity holders during the period	(X)	(X)
Net franking credits available	<u>X</u>	<u>X</u>

## **DELETED IAS 1 TEXT**

*Deleted IAS 1 text is not part of AASB 101.*

### **Paragraph 2**

This Standard shall be applied to all general purpose financial statements prepared and presented in accordance with International Financial Reporting Standards (IFRSs).

### **First sentence of paragraph 15**

In virtually all circumstances, a fair presentation is achieved by compliance with applicable IFRSs.

### **Paragraph 17**

In the extremely rare circumstances in which management concludes that compliance with a requirement in a Standard or an Interpretation would be so misleading that it would conflict with the objective of financial statements set out in the Framework, the entity shall depart from that requirement in the manner set out in paragraph 18 if the relevant regulatory framework requires, or otherwise does not prohibit, such a departure.

### **Paragraph 18**

When an entity departs from a requirement of a Standard or an Interpretation in accordance with paragraph 17, it shall disclose:

- (a) that management has concluded that the financial statements present fairly the entity's financial position, financial performance and cash flows;
- (b) that it has complied with applicable Standards and Interpretations, except that it has departed from a particular requirement to achieve a fair presentation;
- (c) the title of the Standard or Interpretation from which the entity has departed, the nature of the departure, including the treatment that the Standard or Interpretation would require, the reason why that treatment would be so misleading in the circumstances that it would conflict with the objective of financial statements set out in the Framework, and the treatment adopted; and

- (d) for each period presented, the financial impact of the departure on each item in the financial statements that would have been reported in complying with the requirement.

**Paragraph 19**

When an entity has departed from a requirement of a Standard or an Interpretation in a prior period, and that departure affects the amounts recognised in the financial statements for the current period, it shall make the disclosures set out in paragraph 18(c) and (d).

**Paragraph 20**

Paragraph 19 applies, for example, when an entity departed in a prior period from a requirement in a Standard or an Interpretation for the measurement of assets or liabilities and that departure affects the measurement of changes in assets and liabilities recognised in the current period's financial statements.

**Paragraph 127**

An entity shall apply this Standard for annual periods beginning on or after 1 January 2005. Earlier application is encouraged. If an entity applies this Standard for a period beginning before 1 January 2005, it shall disclose that fact.

**Paragraph 127A**

An entity shall apply the amendment in paragraph 96 for annual periods beginning on or after 1 January 2006. If an entity applies the amendments to IAS 19 *Employee Benefits—Actuarial Gains and Losses, Group Plans and Disclosures* for an earlier period, that amendment shall be applied for that earlier period.

**Paragraph 127B**

An entity shall apply the requirements of paragraphs 124A–124C for annual periods beginning on or after 1 January 2007. Earlier application is encouraged.

**Paragraph 128**

This Standard supersedes IAS 1 *Presentation of Financial Statements* revised in 1997.
