Applying the IASB's Revised Conceptual Framework and Solving the Reporting Entity and Special Purpose Financial Statement Problems

The AASB is exploring how to introduce the IASB's revised *Conceptual Framework for Financial Reporting* (RCF) into Australia and improve the consistency, comparability and transparency of financial reports prepared in accordance with Australian Accounting Standards (AAS).

To start this conversation, the AASB released a Consultation Paper in May 2018 which proposes a two-phased approach to apply the RCF in Australia and to address two key issues, the:

1. **reporting entity concept clash** between what is in current Australian requirements versus what is in the IASB's RCF
2. **special purpose financial statements (SPFS) problem**, caused by Australia's unique accounting requirements that allow entities to self-assess as 'Reporting entities' or not; and prepare free-form SPFS for entities who have self-assessed as 'Non-reporting entities'.

The SPFS issues have resulted in vastly divergent reporting practices, additional risk for Directors, preparers and auditors and have been questioned for many years now by the AASB, regulators, the media and other key stakeholders.

AASB Research Reports have highlighted the inconsistent application of Statement of Accounting Concepts SAC 1 *Definition of the Reporting Entity* and the lack of trust and transparency caused by SPFS in all sectors of the Australian economy.

Internationally, Australia's unique self-assessment option and ability to prepare SPFS was rejected by the IASB who stated it does not have the authority to determine who must, should, or could prepare such statements. Accordingly, anyone required to prepare financial statements in accordance with IFRS is preparing general purpose financial statements (GPFS).

The AASB's two-phased approach, would result in the end of the ability to prepare SPFS for entities required by legislation or otherwise to prepare financial statements in accordance with AAS. It will result in two robust tiers of GPFS:

1. **Tier 1 GPFS** for all publicly accountable entities and those that voluntarily prepare Tier 1 GPFS. The Tier 1 framework is IFRS compliant.
2. **Tier 2 GPFS** for all other entities, which will consist of either the existing Tier 2 GPFS Reduced Disclosure Requirements OR a new Tier 2 GPFS Specified Disclosure Requirements depending on the outcome of the Consultation Paper. Both of these Tier 2 frameworks are based on IFRS, modified where appropriate by the AASB for not-for-profit private and public sector amendments.

Additional tiers of reporting

The AASB would be very supportive if objective criteria and thresholds are determined from findings and recommendations of the ACNC's legislative review, developing another tier of reporting (eg modified accruals or cash accounting for small charities in the not-for-profit sector). This alternative has not been included in the Consultation Paper as ACNC's legislative review has not been finalised.

Additional materials

Below are links to additional materials that will assist in understanding the broader issues currently being addressed by the AASB in the Consultation Paper. AASB Staff will continue to update these materials throughout the consultation journey.

Podcast

In this [28-minute podcast](#) AASB Chair Kris Peach speaks with *Accountants Daily* on issues around applying the IASB's Revised Conceptual Framework and solving the reporting entity and special purpose financial statement problems. Also discussed are the upcoming accounting standards on financial instruments, revenue and leases.

Media and Opinion Pieces in support of the proposals

AASB Staff are aware of the following articles available in mainstream media that support the AASB's proposals. This is not an exhaustive list, and the AASB is aware that this does not necessarily depict the full story. The AASB strongly encourages stakeholders to form their views on this topic based on the full range of research and empirical evidence available.
