

Goodwill and Impairment

Project summary

Based on the post-implementation review of IFRS 3 *Business Combinations*, the IASB is exploring possible improvements to disclosures about acquisitions and possible simplifications to the accounting for goodwill and improvements to the impairment test.

The objective of this project is to present to the IASB, the analyst and investor perspective, highlighting insights into the methods used by them to assess impairment on a more-timely basis and the information in the financial statements considered beneficial to users.

The staff of the AASB have prepared this summary for information purposes only. The Board decisions described are tentative and do not change current accounting pronouncements unless otherwise indicated. Official positions of the AASB are determined only after extensive due process and deliberations. While this summary is regularly updated, it does not provide a comprehensive review or statement of events and should not be treated as such.

AASB Action Alert Update, Minutes and Board Papers

Meeting Date	Update
--------------	--------

February 2019

The Board discussed issues arising from research considering analysts' perspectives on impairment and methods that they adopt to identify impairment on a timely basis as well as additional financial statement disclosures that could be useful to users.

The Board decided to make recommendations to the IASB in relation to the following:

- (a) clarifying the purpose of the impairment test;
- (b) conducting further research on developing a modified single model approach, rather than permitting either the Value in Use or the Fair Value less Costs of Disposal models;
- (c) exploring aligning impairment testing with the level at which an entity's results are viewed and decisions are made internally (ie reconsidering the need for cash-generating units as the aggregation level); and
- (d) enhanced disclosure requirements for acquisitions and impairments.

The Board also decided to publish the research.

June 2018

Based on outreach feedback the Board considered possible narrow-scope amendments to IAS 36 *Impairment of Assets* that might be raised with the IASB, pending further research, such as:

- (a) a single, discounted cash flow methodology for both value in use (VIU) and fair value less costs of disposal (FVLCD), including cash flows from future restructuring and enhancements, but with management assumptions for VIU and market-participant assumptions for FVLCD; and
- (b) disclosure of the post-tax discount rate rather than the pre-tax discount rate.

The Board also requested further research into recognising goodwill impairment on a more timely basis, considering feedback from analysts and investors in relation to the methods they adopt and the level at which goodwill is allocated for impairment testing purposes. Additional disclosure requirements for the method used to determine VIU or FVLCD should also be considered, such as a sensitivity analysis for all impairment tests and look-back analysis to assess forecasting accuracy
