BASIS FOR CONCLUSIONS ON IFRS 11 (available on the AASB website)

Australian Accounting Standard AASB 11 Joint Arrangements is set out in paragraphs 1 – 27 and Appendices A – C. All the paragraphs have equal authority. Paragraphs in bold type state the main principles. Terms defined in Appendix A are in italics the first time they appear in the Standard. AASB 11 is to be read in the context of other Australian Accounting Standards, including AASB 1048 Interpretation of Standards, which identifies the Australian Accounting Interpretations. In the absence of explicit guidance, AASB 108 Accounting Policies, Changes in Accounting Estimates and Errors provides a basis for selecting and applying accounting policies.
Introduction

The Australian Accounting Standards Board (AASB) makes Australian Accounting Standards, including Interpretations, to be applied by:

(a) entities required by the Corporations Act 2001 to prepare financial reports;

(b) governments in preparing financial statements for the whole of government and the General Government Sector (GGS); and

(c) entities in the private or public for-profit or not-for-profit sectors that are reporting entities or that prepare general purpose financial statements.

AASB 1053 Application of Tiers of Australian Accounting Standards establishes a differential reporting framework consisting of two tiers of reporting requirements for preparing general purpose financial statements:

(a) Tier 1: Australian Accounting Standards; and

(b) Tier 2: Australian Accounting Standards – Reduced Disclosure Requirements.

Tier 1 requirements incorporate International Financial Reporting Standards (IFRSs), including Interpretations, issued by the International Accounting Standards Board (IASB), with the addition of paragraphs on the applicability of each Standard in the Australian environment.

Publicly accountable for-profit private sector entities are required to adopt Tier 1 requirements, and therefore are required to comply with IFRSs. Furthermore, other for-profit private sector entities complying with Tier 1 requirements will simultaneously comply with IFRSs. Some other entities complying with Tier 1 requirements will also simultaneously comply with IFRSs.

Tier 2 requirements comprise the recognition, measurement and presentation requirements of Tier 1 but substantially reduced disclosure requirements in comparison to Tier 1.

Australian Accounting Standards also include requirements that are specific to Australian entities. These requirements may be located in Australian Accounting Standards that incorporate IFRSs or in other Australian Accounting Standards. In most instances, these requirements are either
restricted to the not-for-profit or public sectors or include additional disclosures that address domestic, regulatory or other issues. These requirements do not prevent publicly accountable for-profit private sector entities from complying with IFRSs. In developing requirements for public sector entities, the AASB considers the requirements of International Public Sector Accounting Standards (IPSASs), as issued by the International Public Sector Accounting Standards Board (IPSASB) of the International Federation of Accountants.

**Differences between this Standard and superseded requirements under AASB 131**

Differences between this Standard and the superseded AASB 131 *Interests in Joint Ventures* are the same as the differences between IFRS 11 *Joint Arrangements* and the superseded requirements under IAS 31 *Joint Arrangements*. The main differences are summarised in the project summary and feedback statement on the IASB’s website in relation to IFRS 11, which is available on the IASB’s website at www.ifrs.org.

**Implications for not-for-profit entities**

This Standard applies to both for-profit and not-for-profit entities. However, prior to the 1 January 2013 mandatory application date of this Standard, the AASB will consider whether this Standard should be modified for application by not-for-profit entities having regard to its *Process for Modifying IFRSs for PBE/NFP*. In light of this, not-for-profit entities are not permitted to apply this Standard prior to the mandatory application date.
COMPARISON WITH IFRS 11

AASB 11 *Joint Arrangements* incorporates IFRS 11 *Joint Arrangements* issued by the International Accounting Standards Board (IASB). Paragraphs that have been added to this Standard (and do not appear in the text of IFRS 11) are identified with the prefix “Aus”, followed by the number of the preceding IASB paragraph and decimal numbering.

Entities that comply with AASB 11 will simultaneously be in compliance with IFRS 11.
ACCOUNTING STANDARD AASB 11

ACCOUNTING STANDARD AASB 11

JOINT ARRANGEMENTS

Objective

1  The objective of this Standard is to establish principles for financial reporting by entities that have an interest in arrangements that are controlled jointly (ie joint arrangements).

Meeting the objective

2  To meet the objective in paragraph 1, this Standard defines joint control and requires an entity that is a party to a joint arrangement to determine the type of joint arrangement in which it is involved by assessing its rights and obligations and to account for those rights and obligations in accordance with that type of joint arrangement.

Application

Aus2.1  This Standard applies to:

(a)  each entity that is required to prepare financial reports in accordance with Part 2M.3 of the Corporations Act and that is a reporting entity;

(b)  general purpose financial statements of each other reporting entity; and

(c)  financial statements that are, or are held out to be, general purpose financial statements.

Aus2.2  This Standard applies to annual reporting periods beginning on or after 1 January 2013.
Aus2.3 This Standard may be applied by for-profit entities, but not by not-for-profit entities, to annual reporting periods beginning on or after 1 January 2005 but before 1 January 2013. If a for-profit entity applies this Standard to such an annual reporting period, it shall disclose that fact and apply AASB 10 Consolidated Financial Statements, AASB 12 Disclosure of Interests in Other Entities, AASB 127 Separate Financial Statements (August 2011) and AASB 128 Investments in Associates and Joint Ventures (August 2011), at the same time.

Aus2.4 The requirements specified in this Standard apply to the financial statements where information resulting from their application is material in accordance with AASB 1031 Materiality.

Aus2.5 When applied or operative, this Standard supersedes:

(a) AASB 131 Interests in Joint Ventures (July 2004, as amended); and

(b) Interpretation 113 Jointly Controlled Entities – Non-Monetary Contributions by Venturers (July 2004, as amended).

Scope

3 This Standard shall be applied by all entities that are a party to a joint arrangement.

Joint arrangements

4 A joint arrangement is an arrangement of which two or more parties have joint control.

5 A joint arrangement has the following characteristics:

(a) The parties are bound by a contractual arrangement (see paragraphs B2–B4).

(b) The contractual arrangement gives two or more of those parties joint control of the arrangement (see paragraphs 7–13).

6 A joint arrangement is either a joint operation or a joint venture.
Joint control

7 Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

8 An entity that is a party to an arrangement shall assess whether the contractual arrangement gives all the parties, or a group of the parties, control of the arrangement collectively. All the parties, or a group of the parties, control the arrangement collectively when they must act together to direct the activities that significantly affect the returns of the arrangement (ie the relevant activities).

9 Once it has been determined that all the parties, or a group of the parties, control the arrangement collectively, joint control exists only when decisions about the relevant activities require the unanimous consent of the parties that control the arrangement collectively.

10 In a joint arrangement, no single party controls the arrangement on its own. A party with joint control of an arrangement can prevent any of the other parties, or a group of the parties, from controlling the arrangement.

11 An arrangement can be a joint arrangement even though not all of its parties have joint control of the arrangement. This Standard distinguishes between parties that have joint control of a joint arrangement (joint operators or joint venturers) and parties that participate in, but do not have joint control of, a joint arrangement.

12 An entity will need to apply judgement when assessing whether all the parties, or a group of the parties, have joint control of an arrangement. An entity shall make this assessment by considering all facts and circumstances (see paragraphs B5–B11).

13 If facts and circumstances change, an entity shall reassess whether it still has joint control of the arrangement.

Types of joint arrangement

14 An entity shall determine the type of joint arrangement in which it is involved. The classification of a joint arrangement as a joint operation or a joint venture depends upon the rights and obligations of the parties to the arrangement.
A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. Those parties are called joint operators.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement. Those parties are called joint venturers.

An entity applies judgement when assessing whether a joint arrangement is a joint operation or a joint venture. An entity shall determine the type of joint arrangement in which it is involved by considering its rights and obligations arising from the arrangement. An entity assesses its rights and obligations by considering the structure and legal form of the arrangement, the terms agreed by the parties in the contractual arrangement and, when relevant, other facts and circumstances (see paragraphs B12–B33).

Sometimes the parties are bound by a framework agreement that sets up the general contractual terms for undertaking one or more activities. The framework agreement might set out that the parties establish different joint arrangements to deal with specific activities that form part of the agreement. Even though those joint arrangements are related to the same framework agreement, their type might be different if the parties’ rights and obligations differ when undertaking the different activities dealt with in the framework agreement. Consequently, joint operations and joint ventures can coexist when the parties undertake different activities that form part of the same framework agreement.

If facts and circumstances change, an entity shall reassess whether the type of joint arrangement in which it is involved has changed.

Financial statements of parties to a joint arrangement

Joint operations

A joint operator shall recognise in relation to its interest in a joint operation:

(a) its assets, including its share of any assets held jointly;

(b) its liabilities, including its share of any liabilities incurred jointly;
(c) its revenue from the sale of its share of the output arising from the joint operation;
(d) its share of the revenue from the sale of the output by the joint operation; and
(e) its expenses, including its share of any expenses incurred jointly.

21 A joint operator shall account for the assets, liabilities, revenues and expenses relating to its interest in a joint operation in accordance with the Standards applicable to the particular assets, liabilities, revenues and expenses.

22 The accounting for transactions such as the sale, contribution or purchase of assets between an entity and a joint operation in which it is a joint operator is specified in paragraphs B34–B37.

23 A party that participates in, but does not have joint control of, a joint operation shall also account for its interest in the arrangement in accordance with paragraphs 20–22 if that party has rights to the assets, and obligations for the liabilities, relating to the joint operation. If a party that participates in, but does not have joint control of, a joint operation does not have rights to the assets, and obligations for the liabilities, relating to that joint operation, it shall account for its interest in the joint operation in accordance with the Standards applicable to that interest.

Joint ventures

24 A joint venturer shall recognise its interest in a joint venture as an investment and shall account for that investment using the equity method in accordance with AASB 128 Investments in Associates and Joint Ventures unless the entity is exempted from applying the equity method as specified in that Standard.

25 A party that participates in, but does not have joint control of, a joint venture shall account for its interest in the arrangement in accordance with AASB 9 Financial Instruments, unless it has significant influence over the joint venture, in which case it shall account for it in accordance with AASB 128 (August 2011).

Separate financial statements

26 In its separate financial statements, a joint operator or joint venturer shall account for its interest in:

AASB 11 12  STANDARD
(a) a joint operation in accordance with paragraphs 20–22;

(b) a joint venture in accordance with paragraph 10 of AASB 127 Separate Financial Statements.

27 In its separate financial statements, a party that participates in, but does not have joint control of, a joint arrangement shall account for its interest in:

(a) a joint operation in accordance with paragraph 23;

(b) a joint venture in accordance with AASB 9, unless the entity has significant influence over the joint venture, in which case it shall apply paragraph 10 of AASB 127 (August 2011).
APPENDIX A

DEFINED TERMS

This appendix is an integral part of AASB 11.

joint arrangement  An arrangement of which two or more parties have joint control.

joint control  The contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

joint operation  A joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement.

joint operator  A party to a joint operation that has joint control of that joint operation.

joint venture  A joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.

joint venturer  A party to a joint venture that has joint control of that joint venture.

party to a joint arrangement  An entity that participates in a joint arrangement, regardless of whether that entity has joint control of the arrangement.

separate vehicle  A separately identifiable financial structure, including separate legal entities or entities recognised by statute, regardless of whether those entities have a legal personality.
The following terms are defined in AASB 127 (August 2011), AASB 128 (August 2011) or AASB 10 Consolidated Financial Statements and are used in this Standard with the meanings specified in those Standards:

- control of an investee
- equity method
- power
- protective rights
- relevant activities
- separate financial statements
- significant influence.
APPENDIX B

APPLICATION GUIDANCE

This appendix is an integral part of AASB 11. It describes the application of paragraphs 1–27 and has the same authority as the other parts of the Standard.

B1 The examples in this appendix portray hypothetical situations. Although some aspects of the examples may be present in actual fact patterns, all relevant facts and circumstances of a particular fact pattern would need to be evaluated when applying AASB 11.

Joint arrangements

Contractual arrangement (paragraph 5)

B2 Contractual arrangements can be evidenced in several ways. An enforceable contractual arrangement is often, but not always, in writing, usually in the form of a contract or documented discussions between the parties. Statutory mechanisms can also create enforceable arrangements, either on their own or in conjunction with contracts between the parties.

B3 When joint arrangements are structured through a separate vehicle (see paragraphs B19–B33), the contractual arrangement, or some aspects of the contractual arrangement, will in some cases be incorporated in the articles, charter or by-laws of the separate vehicle.

B4 The contractual arrangement sets out the terms upon which the parties participate in the activity that is the subject of the arrangement. The contractual arrangement generally deals with such matters as:

(a) the purpose, activity and duration of the joint arrangement.

(b) how the members of the board of directors, or equivalent governing body, of the joint arrangement, are appointed.

(c) the decision-making process: the matters requiring decisions from the parties, the voting rights of the parties and the required level of support for those matters. The decision-making process reflected in the contractual arrangement establishes joint control of the arrangement (see paragraphs B5–B11).

(d) the capital or other contributions required of the parties.
(e) how the parties share assets, liabilities, revenues, expenses or profit or loss relating to the joint arrangement.

**Joint control (paragraphs 7–13)**

**B5** In assessing whether an entity has joint control of an arrangement, an entity shall assess first whether all the parties, or a group of the parties, control the arrangement. AASB 10 defines control and shall be used to determine whether all the parties, or a group of the parties, are exposed, or have rights, to variable returns from their involvement with the arrangement and have the ability to affect those returns through their power over the arrangement. When all the parties, or a group of the parties, considered collectively, are able to direct the activities that significantly affect the returns of the arrangement (ie the relevant activities), the parties control the arrangement collectively.

**B6** After concluding that all the parties, or a group of the parties, control the arrangement collectively, an entity shall assess whether it has joint control of the arrangement. Joint control exists only when decisions about the relevant activities require the unanimous consent of the parties that collectively control the arrangement. Assessing whether the arrangement is jointly controlled by all of its parties or by a group of the parties, or controlled by one of its parties alone, can require judgement.

**B7** Sometimes the decision-making process that is agreed upon by the parties in their contractual arrangement implicitly leads to joint control. For example, assume two parties establish an arrangement in which each has 50 per cent of the voting rights and the contractual arrangement between them specifies that at least 51 per cent of the voting rights are required to make decisions about the relevant activities. In this case, the parties have implicitly agreed that they have joint control of the arrangement because decisions about the relevant activities cannot be made without both parties agreeing.

**B8** In other circumstances, the contractual arrangement requires a minimum proportion of the voting rights to make decisions about the relevant activities. When that minimum required proportion of the voting rights can be achieved by more than one combination of the parties agreeing together, that arrangement is not a joint arrangement unless the contractual arrangement specifies which parties (or combination of parties) are required to agree unanimously to decisions about the relevant activities of the arrangement.
### Application examples

#### Example 1

Assume that three parties establish an arrangement: A has 50 per cent of the voting rights in the arrangement, B has 30 per cent and C has 20 per cent. The contractual arrangement between A, B and C specifies that at least 75 per cent of the voting rights are required to make decisions about the relevant activities of the arrangement. Even though A can block any decision, it does not control the arrangement because it needs the agreement of B. The terms of their contractual arrangement requiring at least 75 per cent of the voting rights to make decisions about the relevant activities imply that A and B have joint control of the arrangement because decisions about the relevant activities of the arrangement cannot be made without both A and B agreeing.

#### Example 2

Assume an arrangement has three parties: A has 50 per cent of the voting rights in the arrangement and B and C each have 25 per cent. The contractual arrangement between A, B and C specifies that at least 75 per cent of the voting rights are required to make decisions about the relevant activities of the arrangement. Even though A can block any decision, it does not control the arrangement because it needs the agreement of either B or C. In this example, A, B and C collectively control the arrangement. However, there is more than one combination of parties that can agree to reach 75 per cent of the voting rights (i.e., either A and B or A and C). In such a situation, to be a joint arrangement the contractual arrangement between the parties would need to specify which combination of the parties is required to agree unanimously to decisions about the relevant activities of the arrangement.

#### Example 3

Assume an arrangement in which A and B each have 35 per cent of the voting rights in the arrangement with the remaining 30 per cent being widely dispersed. Decisions about the relevant activities require approval by a majority of the voting rights. A and B have joint control of the arrangement only if the contractual arrangement specifies that decisions about the relevant activities of the arrangement require both A and B agreeing.

B9 The requirement for unanimous consent means that any party with joint control of the arrangement can prevent any of the other parties, or
a group of the parties, from making unilateral decisions (about the relevant activities) without its consent. If the requirement for unanimous consent relates only to decisions that give a party protective rights and not to decisions about the relevant activities of an arrangement, that party is not a party with joint control of the arrangement.

B10 A contractual arrangement might include clauses on the resolution of disputes, such as arbitration. These provisions may allow for decisions to be made in the absence of unanimous consent among the parties that have joint control. The existence of such provisions does not prevent the arrangement from being jointly controlled and, consequently, from being a joint arrangement.

Assessing joint control

Does the contractual arrangement give all the parties, or a group of the parties, control of the arrangement collectively? 

- **No** → Outside the scope of AASB 11
- **Yes**

Do decisions about the relevant activities require the unanimous consent of all the parties, or a group of the parties, that collectively control the arrangement?

- **No** → Outside the scope of AASB 11
- **Yes**

The arrangement is jointly controlled: the arrangement is a joint arrangement.

B11 When an arrangement is outside the scope of AASB 11, an entity accounts for its interest in the arrangement in accordance with relevant Standards, such as AASB 10, AASB 128 (August 2011) or AASB 9.

Types of joint arrangement (paragraphs 14–19)

B12 Joint arrangements are established for a variety of purposes (eg as a way for parties to share costs and risks, or as a way to provide the parties with access to new technology or new markets), and can be established using different structures and legal forms.
B13 Some arrangements do not require the activity that is the subject of the arrangement to be undertaken in a separate vehicle. However, other arrangements involve the establishment of a separate vehicle.

B14 The classification of joint arrangements required by this Standard depends upon the parties’ rights and obligations arising from the arrangement in the normal course of business. This Standard classifies joint arrangements as either joint operations or joint ventures. When an entity has rights to the assets, and obligations for the liabilities, relating to the arrangement, the arrangement is a joint operation. When an entity has rights to the net assets of the arrangement, the arrangement is a joint venture. Paragraphs B16–B33 set out the assessment an entity carries out to determine whether it has an interest in a joint operation or an interest in a joint venture.

Classification of a joint arrangement

B15 As stated in paragraph B14, the classification of joint arrangements requires the parties to assess their rights and obligations arising from the arrangement. When making that assessment, an entity shall consider the following:

(a) the structure of the joint arrangement (see paragraphs B16–B21).

(b) when the joint arrangement is structured through a separate vehicle:

(i) the legal form of the separate vehicle (see paragraphs B22–B24);

(ii) the terms of the contractual arrangement (see paragraphs B25–B28); and

(iii) when relevant, other facts and circumstances (see paragraphs B29–B33).

Structure of the joint arrangement

Joint arrangements not structured through a separate vehicle

B16 A joint arrangement that is not structured through a separate vehicle is a joint operation. In such cases, the contractual arrangement establishes the parties’ rights to the assets, and obligations for the liabilities, relating to the arrangement, and the parties’ rights to the corresponding revenues and obligations for the corresponding expenses.
B17 The contractual arrangement often describes the nature of the activities that are the subject of the arrangement and how the parties intend to undertake those activities together. For example, the parties to a joint arrangement could agree to manufacture a product together, with each party being responsible for a specific task and each using its own assets and incurring its own liabilities. The contractual arrangement could also specify how the revenues and expenses that are common to the parties are to be shared among them. In such a case, each joint operator recognises in its financial statements the assets and liabilities used for the specific task, and recognises its share of the revenues and expenses in accordance with the contractual arrangement.

B18 In other cases, the parties to a joint arrangement might agree, for example, to share and operate an asset together. In such a case, the contractual arrangement establishes the parties’ rights to the asset that is operated jointly, and how output or revenue from the asset and operating costs are shared among the parties. Each joint operator accounts for its share of the joint asset and its agreed share of any liabilities, and recognises its share of the output, revenues and expenses in accordance with the contractual arrangement.

Joint arrangements structured through a separate vehicle

B19 A joint arrangement in which the assets and liabilities relating to the arrangement are held in a separate vehicle can be either a joint venture or a joint operation.

B20 Whether a party is a joint operator or a joint venturer depends on the party’s rights to the assets, and obligations for the liabilities, relating to the arrangement that are held in the separate vehicle.

B21 As stated in paragraph B15, when the parties have structured a joint arrangement in a separate vehicle, the parties need to assess whether the legal form of the separate vehicle, the terms of the contractual arrangement and, when relevant, any other facts and circumstances give them:

(a) rights to the assets, and obligations for the liabilities, relating to the arrangement (ie the arrangement is a joint operation); or

(b) rights to the net assets of the arrangement (ie the arrangement is a joint venture).
Classification of a joint arrangement: assessment of the parties' rights and obligations arising from the arrangement

Structure of the joint arrangement

Not structured through a separate vehicle

Structured through a separate vehicle

An entity shall consider:
(i) The legal form of the separate vehicle;
(ii) The terms of the contractual arrangement; and
(iii) When relevant, other facts and circumstances.

Joint operation

Joint venture

The legal form of the separate vehicle

B22 The legal form of the separate vehicle is relevant when assessing the type of joint arrangement. The legal form assists in the initial assessment of the parties’ rights to the assets and obligations for the liabilities held in the separate vehicle, such as whether the parties have interests in the assets held in the separate vehicle and whether they are liable for the liabilities held in the separate vehicle.

B23 For example, the parties might conduct the joint arrangement through a separate vehicle, whose legal form causes the separate vehicle to be considered in its own right (ie the assets and liabilities held in the separate vehicle are the assets and liabilities of the separate vehicle and not the assets and liabilities of the parties). In such a case, the assessment of the rights and obligations conferred upon the parties by the legal form of the separate vehicle indicates that the arrangement is a joint venture. However, the terms agreed by the parties in their contractual arrangement (see paragraphs B25–B28) and, when relevant, other facts and circumstances (see paragraphs B29–B33) can
override the assessment of the rights and obligations conferred upon the parties by the legal form of the separate vehicle.

B24 The assessment of the rights and obligations conferred upon the parties by the legal form of the separate vehicle is sufficient to conclude that the arrangement is a joint operation only if the parties conduct the joint arrangement in a separate vehicle whose legal form does not confer separation between the parties and the separate vehicle (ie the assets and liabilities held in the separate vehicle are the parties’ assets and liabilities).

Assessing the terms of the contractual arrangement

B25 In many cases, the rights and obligations agreed to by the parties in their contractual arrangements are consistent, or do not conflict, with the rights and obligations conferred on the parties by the legal form of the separate vehicle in which the arrangement has been structured.

B26 In other cases, the parties use the contractual arrangement to reverse or modify the rights and obligations conferred by the legal form of the separate vehicle in which the arrangement has been structured.

Application example

Example 4

Assume that two parties structure a joint arrangement in an incorporated entity. Each party has a 50 per cent ownership interest in the incorporated entity. The incorporation enables the separation of the entity from its owners and as a consequence the assets and liabilities held in the entity are the assets and liabilities of the incorporated entity. In such a case, the assessment of the rights and obligations conferred upon the parties by the legal form of the separate vehicle indicates that the parties have rights to the net assets of the arrangement.

However, the parties modify the features of the corporation through their contractual arrangement so that each has an interest in the assets of the incorporated entity and each is liable for the liabilities of the incorporated entity in a specified proportion. Such contractual modifications to the features of a corporation can cause an arrangement to be a joint operation.

B27 The following table compares common terms in contractual arrangements of parties to a joint operation and common terms in contractual arrangements of parties to a joint venture. The examples of
the contractual terms provided in the following table are not exhaustive.

<th>Joint operation</th>
<th>Joint venture</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Revenues, expenses, profit or loss</strong></td>
<td>The contractual arrangement establishes the allocation of revenues and expenses on the basis of the relative performance of each party to the joint arrangement. For example, the contractual arrangement might establish that revenues and expenses are allocated on the basis of the capacity that each party uses in a plant operated jointly, which could differ from their ownership interest in the joint arrangement. In other instances, the parties might have agreed to share the profit or loss relating to the arrangement on the basis of a specified proportion such as the parties’ ownership interest in the arrangement. This would not prevent the arrangement from being a joint operation if the parties have rights to the assets, and obligations for the liabilities, relating to the arrangement.</td>
<td>The contractual arrangement establishes each party’s share in the profit or loss relating to the activities of the arrangement.</td>

Assessing the terms of the contractual arrangement

<table>
<thead>
<tr>
<th>Guarantees</th>
<th>Joint operation</th>
<th>Joint venture</th>
</tr>
</thead>
<tbody>
<tr>
<td>The parties to joint arrangements are often required to provide guarantees to third parties that, for example, receive a service from, or provide financing to, the joint arrangement. The provision of such guarantees, or the commitment by the parties to provide them, does not, by itself, determine that the joint arrangement is a joint operation. The feature that determines whether the joint arrangement is a joint operation or a joint venture is whether the parties have obligations for the liabilities relating to the arrangement (for some of which the parties might or might not have provided a guarantee).</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

B28 When the contractual arrangement specifies that the parties have rights to the assets, and obligations for the liabilities, relating to the arrangement, they are parties to a joint operation and do not need to consider other facts and circumstances (paragraphs B29–B33) for the purposes of classifying the joint arrangement.

Assessing other facts and circumstances

B29 When the terms of the contractual arrangement do not specify that the parties have rights to the assets, and obligations for the liabilities, relating to the arrangement, the parties shall consider other facts and circumstances to assess whether the arrangement is a joint operation or a joint venture.

B30 A joint arrangement might be structured in a separate vehicle whose legal form confers separation between the parties and the separate vehicle. The contractual terms agreed among the parties might not specify the parties’ rights to the assets and obligations for the liabilities, yet consideration of other facts and circumstances can lead to such an arrangement being classified as a joint operation. This will be the case when other facts and circumstances give the parties rights to the assets, and obligations for the liabilities, relating to the arrangement.

B31 When the activities of an arrangement are primarily designed for the provision of output to the parties, this indicates that the parties have rights to substantially all the economic benefits of the assets of the
arrangement. The parties to such arrangements often ensure their access to the outputs provided by the arrangement by preventing the arrangement from selling output to third parties.

B32 The effect of an arrangement with such a design and purpose is that the liabilities incurred by the arrangement are, in substance, satisfied by the cash flows received from the parties through their purchases of the output. When the parties are substantially the only source of cash flows contributing to the continuity of the operations of the arrangement, this indicates that the parties have an obligation for the liabilities relating to the arrangement.

Application example

Example 5

Assume that two parties structure a joint arrangement in an incorporated entity (entity C) in which each party has a 50 per cent ownership interest. The purpose of the arrangement is to manufacture materials required by the parties for their own, individual manufacturing processes. The arrangement ensures that the parties operate the facility that produces the materials to the quantity and quality specifications of the parties.

The legal form of entity C (an incorporated entity) through which the activities are conducted initially indicates that the assets and liabilities held in entity C are the assets and liabilities of entity C. The contractual arrangement between the parties does not specify that the parties have rights to the assets or obligations for the liabilities of entity C. Accordingly, the legal form of entity C and the terms of the contractual arrangement indicate that the arrangement is a joint venture.

However, the parties also consider the following aspects of the arrangement:

- The parties agreed to purchase all the output produced by entity C in a ratio of 50:50. Entity C cannot sell any of the output to third parties, unless this is approved by the two parties to the arrangement. Because the purpose of the arrangement is to provide the parties with output they require, such sales to third parties are expected to be uncommon and not material.

- The price of the output sold to the parties is set by both parties at a level that is designed to cover the costs of production and administrative expenses incurred by entity C. On the basis of
this operating model, the arrangement is intended to operate at a break-even level.

From the fact pattern above, the following facts and circumstances are relevant:

- The obligation of the parties to purchase all the output produced by entity C reflects the exclusive dependence of entity C upon the parties for the generation of cash flows and, thus, the parties have an obligation to fund the settlement of the liabilities of entity C.

- The fact that the parties have rights to all the output produced by entity C means that the parties are consuming, and therefore have rights to, all the economic benefits of the assets of entity C.

These facts and circumstances indicate that the arrangement is a joint operation. The conclusion about the classification of the joint arrangement in these circumstances would not change if, instead of the parties using their share of the output themselves in a subsequent manufacturing process, the parties sold their share of the output to third parties.

If the parties changed the terms of the contractual arrangement so that the arrangement was able to sell output to third parties, this would result in entity C assuming demand, inventory and credit risks. In that scenario, such a change in the facts and circumstances would require reassessment of the classification of the joint arrangement. Such facts and circumstances would indicate that the arrangement is a joint venture.

B33 The following flow chart reflects the assessment an entity follows to classify an arrangement when the joint arrangement is structured through a separate vehicle:
Classification of a joint arrangement structured through a separate vehicle

1. **Legal form of the separate vehicle**
   - Does the legal form of the separate vehicle give the parties rights to the assets, and obligations for the liabilities, relating to the arrangement?
     - Yes
     - No

2. **Terms of the contractual arrangement**
   - Do the terms of the contractual arrangement specify that the parties have rights to the assets, and obligations for the liabilities, relating to the arrangement?
     - Yes
     - No

3. **Other facts and circumstances**
   - Have the parties designed the arrangement so that:
     - (a) its activities primarily aim to provide the parties with an output (i.e., the parties have rights to substantially all the economic benefits of the assets held in the separate vehicle) and
     - (b) it depends on the parties on a continuous basis for settling the liabilities relating to the activity conducted through the arrangement?
     - Yes
     - No

4. **Classification**
   - Joint venture
   - Joint operation
Financial statements of parties to a joint arrangement (paragraph 22)

Accounting for sales or contributions of assets to a joint operation

B34  When an entity enters into a transaction with a joint operation in which it is a joint operator, such as a sale or contribution of assets, it is conducting the transaction with the other parties to the joint operation and, as such, the joint operator shall recognise gains and losses resulting from such a transaction only to the extent of the other parties’ interests in the joint operation.

B35  When such transactions provide evidence of a reduction in the net realisable value of the assets to be sold or contributed to the joint operation, or of an impairment loss of those assets, those losses shall be recognised fully by the joint operator.

Accounting for purchases of assets from a joint operation

B36  When an entity enters into a transaction with a joint operation in which it is a joint operator, such as a purchase of assets, it shall not recognise its share of the gains and losses until it resells those assets to a third party.

B37  When such transactions provide evidence of a reduction in the net realisable value of the assets to be purchased or of an impairment loss of those assets, a joint operator shall recognise its share of those losses.
APPENDIX C

EFFECTIVE DATE AND TRANSITION

This appendix is an integral part of AASB 11 and has the same authority as the other parts of the Standard.

Effective date

C1 [Deleted by the AASB – see paragraphs Aus2.2 and Aus2.3]

Transition

Joint ventures – transition from proportionate consolidation to the equity method

C2 When changing from proportionate consolidation to the equity method, an entity shall recognise its investment in the joint venture as at the beginning of the earliest period presented. That initial investment shall be measured as the aggregate of the carrying amounts of the assets and liabilities that the entity had previously proportionately consolidated, including any goodwill arising from acquisition. If the goodwill previously belonged to a larger cash-generating unit, or to a group of cash-generating units, the entity shall allocate goodwill to the joint venture on the basis of the relative carrying amounts of the joint venture and the cash-generating unit or group of cash-generating units to which it belonged.

C3 The opening balance of the investment determined in accordance with paragraph C2 is regarded as the deemed cost of the investment at initial recognition. An entity shall apply paragraphs 40–43 of AASB 128 (August 2011) to the opening balance of the investment to assess whether the investment is impaired and shall recognise any impairment loss as an adjustment to retained earnings at the beginning of the earliest period presented. The initial recognition exception in paragraphs 15 and 24 of AASB 112 Income Taxes does not apply when the entity recognises an investment in a joint venture resulting from applying the transition requirements for joint ventures that had previously been proportionately consolidated.

C4 If aggregating all previously proportionately consolidated assets and liabilities results in negative net assets, an entity shall assess whether it has legal or constructive obligations in relation to the negative net assets and, if so, the entity shall recognise the corresponding liability.
If the entity concludes that it does not have legal or constructive obligations in relation to the negative net assets, it shall not recognise the corresponding liability but it shall adjust retained earnings at the beginning of the earliest period presented. The entity shall disclose this fact, along with its cumulative unrecognised share of losses of its joint ventures as at the beginning of the earliest period presented and at the date at which this Standard is first applied.

C5 An entity shall disclose a breakdown of the assets and liabilities that have been aggregated into the single line investment balance as at the beginning of the earliest period presented. That disclosure shall be prepared in an aggregated manner for all joint ventures for which an entity applies the transition requirements referred to in paragraphs C2–C6.

C6 After initial recognition, an entity shall account for its investment in the joint venture using the equity method in accordance with AASB 128 (August 2011).

**Joint operations – transition from the equity method to accounting for assets and liabilities**

C7 When changing from the equity method to accounting for assets and liabilities in respect of its interest in a joint operation, an entity shall, at the beginning of the earliest period presented, derecognise the investment that was previously accounted for using the equity method and any other items that formed part of the entity’s net investment in the arrangement in accordance with paragraph 38 of AASB 128 (August 2011) and recognise its share of each of the assets and the liabilities in respect of its interest in the joint operation, including any goodwill that might have formed part of the carrying amount of the investment.

C8 An entity shall determine its interest in the assets and liabilities relating to the joint operation on the basis of its rights and obligations in a specified proportion in accordance with the contractual arrangement. An entity measures the initial carrying amounts of the assets and liabilities by disaggregating them from the carrying amount of the investment at the beginning of the earliest period presented on the basis of the information used by the entity in applying the equity method.

C9 Any difference arising from the investment previously accounted for using the equity method together with any other items that formed part of the entity’s net investment in the arrangement in accordance with paragraph 38 of AASB 128 (August 2011), and the net amount of the assets and liabilities, including any goodwill, recognised shall be:
(a) offset against any goodwill relating to the investment with any remaining difference adjusted against retained earnings at the beginning of the earliest period presented, if the net amount of the assets and liabilities, including any goodwill, recognised is higher than the investment (and any other items that formed part of the entity’s net investment) derecognised.

(b) adjusted against retained earnings at the beginning of the earliest period presented, if the net amount of the assets and liabilities, including any goodwill, recognised is lower than the investment (and any other items that formed part of the entity’s net investment) derecognised.

C10 An entity changing from the equity method to accounting for assets and liabilities shall provide a reconciliation between the investment derecognised, and the assets and liabilities recognised, together with any remaining difference adjusted against retained earnings, at the beginning of the earliest period presented.

C11 The initial recognition exception in paragraphs 15 and 24 of AASB 112 does not apply when the entity recognises assets and liabilities relating to its interest in a joint operation.

**Transition provisions in an entity’s separate financial statements**

C12 An entity that, in accordance with paragraph 10 of AASB 127, was previously accounting in its separate financial statements for its interest in a joint operation as an investment at cost or in accordance with AASB 9 shall:

(a) derecognise the investment and recognise the assets and the liabilities in respect of its interest in the joint operation at the amounts determined in accordance with paragraphs C7–C9.

(b) provide a reconciliation between the investment derecognised, and the assets and liabilities recognised, together with any remaining difference adjusted in retained earnings, at the beginning of the earliest period presented.

C13 The initial recognition exception in paragraphs 15 and 24 of AASB 112 does not apply when the entity recognises assets and liabilities relating to its interest in a joint operation in its separate financial statements resulting from applying the transition requirements for joint operations referred to in paragraph C12.
References to AASB 9

C14 If an entity applies this Standard but does not yet apply AASB 9, any reference to AASB 9 shall be read as a reference to AASB 139 Financial Instruments: Recognition and Measurement.

Withdrawal of other IFRSs

ILLUSTRATIVE EXAMPLES

These examples accompany, but are not part of, AASB 11. They illustrate aspects of AASB 11 but are not intended to provide interpretative guidance.

IE1 These examples portray hypothetical situations illustrating the judgements that might be used when applying AASB 11 in different situations. Although some aspects of the examples may be present in actual fact patterns, all relevant facts and circumstances of a particular fact pattern would need to be evaluated when applying AASB 11.

Example 1 – Construction services

IE2 A and B (the parties) are two companies whose businesses are the provision of many types of public and private construction services. They set up a contractual arrangement to work together for the purpose of fulfilling a contract with a government for the design and construction of a road between two cities. The contractual arrangement determines the participation shares of A and B and establishes joint control of the arrangement, the subject matter of which is the delivery of the road.

IE3 The parties set up a separate vehicle (entity Z) through which to conduct the arrangement. Entity Z, on behalf of A and B, enters into the contract with the government. In addition, the assets and liabilities relating to the arrangement are held in entity Z. The main feature of entity Z’s legal form is that the parties, not entity Z, have rights to the assets, and obligations for the liabilities, of the entity.

IE4 The contractual arrangement between A and B additionally establishes that:

(a) the rights to all the assets needed to undertake the activities of the arrangement are shared by the parties on the basis of their participation shares in the arrangement;

(b) the parties have several and joint responsibility for all operating and financial obligations relating to the activities of the arrangement on the basis of their participation shares in the arrangement; and

(c) the profit or loss resulting from the activities of the arrangement is shared by A and B on the basis of their participation shares in the arrangement.
IE5 For the purposes of co-ordinating and overseeing the activities, A and B appoint an operator, who will be an employee of one of the parties. After a specified time, the role of the operator will rotate to an employee of the other party. A and B agree that the activities will be executed by the operator’s employees on a ‘no gain or loss’ basis.

IE6 In accordance with the terms specified in the contract with the government, entity Z invoices the construction services to the government on behalf of the parties.

Analysis

IE7 The joint arrangement is carried out through a separate vehicle whose legal form does not confer separation between the parties and the separate vehicle (ie the assets and liabilities held in entity Z are the parties’ assets and liabilities). This is reinforced by the terms agreed by the parties in their contractual arrangement, which state that A and B have rights to the assets, and obligations for the liabilities, relating to the arrangement that is conducted through entity Z. The joint arrangement is a joint operation.

IE8 A and B each recognise in their financial statements their share of the assets (eg property, plant and equipment, accounts receivable) and their share of any liabilities resulting from the arrangement (eg accounts payable to third parties) on the basis of their agreed participation share. Each also recognises its share of the revenue and expenses resulting from the construction services provided to the government through entity Z.

Example 2 – Shopping centre operated jointly

IE9 Two real estate companies (the parties) set up a separate vehicle (entity X) for the purpose of acquiring and operating a shopping centre. The contractual arrangement between the parties establishes joint control of the activities that are conducted in entity X. The main feature of entity X’s legal form is that the entity, not the parties, has rights to the assets, and obligations for the liabilities, relating to the arrangement. These activities include the rental of the retail units, managing the car park, maintaining the centre and its equipment, such as lifts, and building the reputation and customer base for the centre as a whole.

IE10 The terms of the contractual arrangement are such that:

(a) entity X owns the shopping centre. The contractual arrangement does not specify that the parties have rights to the shopping centre.
(b) the parties are not liable in respect of the debts, liabilities or obligations of entity X. If entity X is unable to pay any of its debts or other liabilities or to discharge its obligations to third parties, the liability of each party to any third party will be limited to the unpaid amount of that party’s capital contribution.

(c) the parties have the right to sell or pledge their interests in entity X.

(d) each party receives a share of the income from operating the shopping centre (which is the rental income net of the operating costs) in accordance with its interest in entity X.

Analysis

IE11 The joint arrangement is carried out through a separate vehicle whose legal form causes the separate vehicle to be considered in its own right (i.e., the assets and liabilities held in the separate vehicle are the assets and liabilities of the separate vehicle and not the assets and liabilities of the parties). In addition, the terms of the contractual arrangement do not specify that the parties have rights to the assets, or obligations for the liabilities, relating to the arrangement. Instead, the terms of the contractual arrangement establish that the parties have rights to the net assets of entity X.

IE12 On the basis of the description above, there are no other facts and circumstances that indicate that the parties have rights to substantially all the economic benefits of the assets relating to the arrangement, and that the parties have an obligation for the liabilities relating to the arrangement. The joint arrangement is a joint venture.

IE13 The parties recognise their rights to the net assets of entity X as investments and account for them using the equity method.

Example 3 – Joint manufacturing and distribution of a product

IE14 Companies A and B (the parties) have set up a strategic and operating agreement (the framework agreement) in which they have agreed the terms according to which they will conduct the manufacturing and distribution of a product (product P) in different markets.

IE15 The parties have agreed to conduct manufacturing and distribution activities by establishing joint arrangements, as described below:
(a) Manufacturing activity: the parties have agreed to undertake the manufacturing activity through a joint arrangement (the manufacturing arrangement). The manufacturing arrangement is structured in a separate vehicle (entity M) whose legal form causes it to be considered in its own right (i.e., the assets and liabilities held in entity M are the assets and liabilities of entity M and not the assets and liabilities of the parties). In accordance with the framework agreement, the parties have committed themselves to purchasing the whole production of product P manufactured by the manufacturing arrangement in accordance with their ownership interests in entity M. The parties subsequently sell product P to another arrangement, jointly controlled by the two parties themselves, that has been established exclusively for the distribution of product P as described below. Neither the framework agreement nor the contractual arrangement between A and B dealing with the manufacturing activity specifies that the parties have rights to the assets, and obligations for the liabilities, relating to the manufacturing activity.

(b) Distribution activity: the parties have agreed to undertake the distribution activity through a joint arrangement (the distribution arrangement). The parties have structured the distribution arrangement in a separate vehicle (entity D) whose legal form causes it to be considered in its own right (i.e., the assets and liabilities held in entity D are the assets and liabilities of entity D and not the assets and liabilities of the parties). In accordance with the framework agreement, the distribution arrangement orders its requirements for product P from the parties according to the needs of the different markets where the distribution arrangement sells the product. Neither the framework agreement nor the contractual arrangement between A and B dealing with the distribution activity specifies that the parties have rights to the assets, and obligations for the liabilities, relating to the distribution activity.

IE16 In addition, the framework agreement establishes:

(a) that the manufacturing arrangement will produce product P to meet the requirements for product P that the distribution arrangement places on the parties;

(b) the commercial terms relating to the sale of product P by the manufacturing arrangement to the parties. The manufacturing arrangement will sell product P to the parties at a price agreed by A and B that covers all production costs incurred. Subsequently,
the parties sell the product to the distribution arrangement at a price agreed by A and B.

(c) that any cash shortages that the manufacturing arrangement may incur will be financed by the parties in accordance with their ownership interests in entity M.

Analysis

IE17 The framework agreement sets up the terms under which parties A and B conduct the manufacturing and distribution of product P. These activities are undertaken through joint arrangements whose purpose is either the manufacturing or the distribution of product P.

IE18 The parties carry out the manufacturing arrangement through entity M whose legal form confers separation between the parties and the entity. In addition, neither the framework agreement nor the contractual arrangement dealing with the manufacturing activity specifies that the parties have rights to the assets, and obligations for the liabilities, relating to the manufacturing activity. However, when considering the following facts and circumstances the parties have concluded that the manufacturing arrangement is a joint operation:

(a) The parties have committed themselves to purchasing the whole production of product P manufactured by the manufacturing arrangement. Consequently, A and B have rights to substantially all the economic benefits of the assets of the manufacturing arrangement.

(b) The manufacturing arrangement manufactures product P to meet the quantity and quality needs of the parties so that they can fulfill the demand for product P of the distribution arrangement. The exclusive dependence of the manufacturing arrangement upon the parties for the generation of cash flows and the parties’ commitments to provide funds when the manufacturing arrangement incurs any cash shortages indicate that the parties have an obligation for the liabilities of the manufacturing arrangement, because those liabilities will be settled through the parties’ purchases of product P or by the parties’ direct provision of funds.

IE19 The parties carry out the distribution activities through entity D, whose legal form confers separation between the parties and the entity. In addition, neither the framework agreement nor the contractual arrangement dealing with the distribution activity specifies that the parties have rights to the assets, and obligations for the liabilities, relating to the distribution activity.
IE20 There are no other facts and circumstances that indicate that the parties have rights to substantially all the economic benefits of the assets relating to the distribution arrangement or that the parties have an obligation for the liabilities relating to that arrangement. The distribution arrangement is a joint venture.

IE21 A and B each recognise in their financial statements their share of the assets (eg property, plant and equipment, cash) and their share of any liabilities resulting from the manufacturing arrangement (eg accounts payable to third parties) on the basis of their ownership interest in entity M. Each party also recognises its share of the expenses resulting from the manufacture of product P incurred by the manufacturing arrangement and its share of the revenues relating to the sales of product P to the distribution arrangement.

IE22 The parties recognise their rights to the net assets of the distribution arrangement as investments and account for them using the equity method.

Variation

IE23 Assume that the parties agree that the manufacturing arrangement described above is responsible not only for manufacturing product P, but also for its distribution to third-party customers.

IE24 The parties also agree to set up a distribution arrangement like the one described above to distribute product P exclusively to assist in widening the distribution of product P in additional specific markets.

IE25 The manufacturing arrangement also sells product P directly to the distribution arrangement. No fixed proportion of the production of the manufacturing arrangement is committed to be purchased by, or to be reserved to, the distribution arrangement.

Analysis

IE26 The variation has affected neither the legal form of the separate vehicle in which the manufacturing activity is conducted nor the contractual terms relating to the parties’ rights to the assets, and obligations for the liabilities, relating to the manufacturing activity. However, it causes the manufacturing arrangement to be a self-financed arrangement because it is able to undertake trade on its own behalf, distributing product P to third-party customers and, consequently, assuming demand, inventory and credit risks. Even though the manufacturing arrangement might also sell product P to the distribution arrangement, in this scenario the manufacturing arrangement is not dependent on the
parties to be able to carry out its activities on a continuous basis. In
this case, the manufacturing arrangement is a joint venture.

IE27 The variation has no effect on the classification of the distribution
arrangement as a joint venture.

IE28 The parties recognise their rights to the net assets of the manufacturing
arrangement and their rights to the net assets of the distribution
arrangement as investments and account for them using the equity
method.

Example 4 – Bank operated jointly

IE29 Banks A and B (the parties) agreed to combine their corporate,
investment banking, asset management and services activities by
establishing a separate vehicle (bank C). Both parties expect the
arrangement to benefit them in different ways. Bank A believes that
the arrangement could enable it to achieve its strategic plans to
increase its size, offering an opportunity to exploit its full potential for
organic growth through an enlarged offering of products and services.
Bank B expects the arrangement to reinforce its offering in financial
savings and market products.

IE30 The main feature of bank C’s legal form is that it causes the separate
vehicle to be considered in its own right (ie the assets and liabilities
held in the separate vehicle are the assets and liabilities of the separate
vehicle and not the assets and liabilities of the parties). Banks A and B
each have a 40 per cent ownership interest in bank C, with the
remaining 20 per cent being listed and widely held. The shareholders’
agreement between bank A and bank B establishes joint control of the
activities of bank C.

IE31 In addition, bank A and bank B entered into an irrevocable agreement
under which, even in the event of a dispute, both banks agree to
provide the necessary funds in equal amount and, if required, jointly
and severally, to ensure that bank C complies with the applicable
legislation and banking regulations, and honours any commitments
made to the banking authorities. This commitment represents the
assumption by each party of 50 per cent of any funds needed to ensure
that bank C complies with legislation and banking regulations.

Analysis

IE32 The joint arrangement is carried out through a separate vehicle whose
legal form confers separation between the parties and the separate
vehicle. The terms of the contractual arrangement do not specify that
the parties have rights to the assets, or obligations for the liabilities, of
bank C, but it establishes that the parties have rights to the net assets of
bank C. The commitment by the parties to provide support if bank C is
not able to comply with the applicable legislation and banking
regulations is not by itself a determinant that the parties have an
obligation for the liabilities of bank C. There are no other facts and
circumstances that indicate that the parties have rights to substantially
all the economic benefits of the assets of bank C and that the parties
have an obligation for the liabilities of bank C. The joint arrangement
is a joint venture.

IE33  Both banks A and B recognise their rights to the net assets of bank C as
investments and account for them using the equity method.

Example 5 – Oil and gas exploration, development
and production activities

IE34  Companies A and B (the parties) set up a separate vehicle (entity H)
and a Joint Operating Agreement (JOA) to undertake oil and gas
exploration, development and production activities in country O. The
main feature of entity H’s legal form is that it causes the separate
vehicle to be considered in its own right (i.e., the assets and liabilities
held in the separate vehicle are the assets and liabilities of the separate
vehicle and not the assets and liabilities of the parties).

IE35  Country O has granted entity H permits for the oil and gas exploration,
development and production activities to be undertaken in a specific
assigned block of land (fields).

IE36  The shareholders’ agreement and JOA agreed by the parties establish
their rights and obligations relating to those activities. The main terms
of those agreements are summarised below.

Shareholders’ agreement

IE37  The board of entity H consists of a director from each party. Each
party has a 50 per cent shareholding in entity H. The unanimous
consent of the directors is required for any resolution to be passed.

Joint Operating Agreement (JOA)

IE38  The JOA establishes an Operating Committee. This Committee
consists of one representative from each party. Each party has a 50 per
cent participating interest in the Operating Committee.
IE39 The Operating Committee approves the budgets and work programmes relating to the activities, which also require the unanimous consent of the representatives of each party. One of the parties is appointed as operator and is responsible for managing and conducting the approved work programmes.

IE40 The JOA specifies that the rights and obligations arising from the exploration, development and production activities shall be shared among the parties in proportion to each party’s shareholding in entity H. In particular, the JOA establishes that the parties share:

(a) the rights and the obligations arising from the exploration and development permits granted to entity H (eg the permits, rehabilitation liabilities, any royalties and taxes payable);

(b) the production obtained; and

(c) all costs associated with all work programmes.

IE41 The costs incurred in relation to all the work programmes are covered by cash calls on the parties. If either party fails to satisfy its monetary obligations, the other is required to contribute to entity H the amount in default. The amount in default is regarded as a debt owed by the defaulting party to the other party.

Analysis

IE42 The parties carry out the joint arrangement through a separate vehicle whose legal form confers separation between the parties and the separate vehicle. The parties have been able to reverse the initial assessment of their rights and obligations arising from the legal form of the separate vehicle in which the arrangement is conducted. They have done this by agreeing terms in the JOA that entitle them to rights to the assets (eg exploration and development permits, production, and any other assets arising from the activities) and obligations for the liabilities (eg all costs and obligations arising from the work programmes) that are held in entity H. The joint arrangement is a joint operation.

IE43 Both company A and company B recognise in their financial statements their own share of the assets and of any liabilities resulting from the arrangement on the basis of their agreed participating interest. On that basis, each party also recognises its share of the revenue (from the sale of their share of the production) and its share of the expenses.
Example 6 – Liquefied natural gas arrangement

IE44 Company A owns an undeveloped gas field that contains substantial gas resources. Company A determines that the gas field will be economically viable only if the gas is sold to customers in overseas markets. To do so, a liquefied natural gas (LNG) facility must be built to liquify the gas so that it can be transported by ship to the overseas markets.

IE45 Company A enters into a joint arrangement with company B in order to develop and operate the gas field and the LNG facility. Under that arrangement, companies A and B (the parties) agree to contribute the gas field and cash, respectively, to a new separate vehicle, entity C. In exchange for those contributions, the parties each take a 50 per cent ownership interest in entity C. The main feature of entity C’s legal form is that it causes the separate vehicle to be considered in its own right (ie the assets and liabilities held in the separate vehicle are the assets and liabilities of the separate vehicle and not the assets and liabilities of the parties).

IE46 The contractual arrangement between the parties specifies that:

(a) companies A and B must each appoint two members to the board of entity C. The board of directors must unanimously agree the strategy and investments made by entity C.

(b) day-to-day management of the gas field and LNG facility, including development and construction activities, will be undertaken by the staff of company B in accordance with the directions jointly agreed by the parties. Entity C will reimburse B for the costs it incurs in managing the gas field and LNG facility.

(c) entity C is liable for taxes and royalties on the production and sale of LNG as well as for other liabilities incurred in the ordinary course of business, such as accounts payable, site restoration and decommissioning liabilities.

(d) companies A and B have equal shares in the profit from the activities carried out in the arrangement and, as such, are entitled to equal shares of any dividends distributed by entity C.

IE47 The contractual arrangement does not specify that either party has rights to the assets, or obligations for the liabilities, of entity C.
IE48 The board of entity C decides to enter into a financing arrangement with a syndicate of lenders to help fund the development of the gas field and construction of the LNG facility. The estimated total cost of the development and construction is CU1,000 million.¹

IE49 The lending syndicate provides entity C with a CU700 million loan. The arrangement specifies that the syndicate has recourse to companies A and B only if entity C defaults on the loan arrangement during the development of the field and construction of the LNG facility. The lending syndicate agrees that it will not have recourse to companies A and B once the LNG facility is in production because it has assessed that the cash inflows that entity C should generate from LNG sales will be sufficient to meet the loan repayments. Although at this time the lenders have no recourse to companies A and B, the syndicate maintains protection against default by entity C by taking a lien on the LNG facility.

Analysis

IE50 The joint arrangement is carried out through a separate vehicle whose legal form confers separation between the parties and the separate vehicle. The terms of the contractual arrangement do not specify that the parties have rights to the assets, or obligations for the liabilities, of entity C, but they establish that the parties have rights to the net assets of entity C. The recourse nature of the financing arrangement during the development of the gas field and construction of the LNG facility (ie companies A and B providing separate guarantees during this phase) does not, by itself, impose on the parties an obligation for the liabilities of entity C (ie the loan is a liability of entity C). Companies A and B have separate liabilities, which are their guarantees to repay that loan if entity C defaults during the development and construction phase.

IE51 There are no other facts and circumstances that indicate that the parties have rights to substantially all the economic benefits of the assets of entity C and that the parties have an obligation for the liabilities of entity C. The joint arrangement is a joint venture.

IE52 The parties recognise their rights to the net assets of entity C as investments and account for them using the equity method.

¹ In this example monetary amounts are denominated in ‘currency units (CU)’.

Paragraph C1

An entity shall apply this IFRS for annual periods beginning on or after 1 January 2013. Earlier application is permitted. If an entity applies this IFRS earlier, it shall disclose that fact and apply IFRS 10, IFRS 12 Disclosure of Interests in Other Entities, IAS 27 (as amended in 2011) and IAS 28 (as amended in 2011) at the same time.

Paragraph C15

This IFRS supersedes the following IFRSs:

(a) IAS 31 Interests in Joint Ventures; and

(b) SIC-13 Jointly Controlled Entities – Non-Monetary Contributions by Venturers.
