Draft IFRIC Interpretation DI/2012/1

Levies Charged by Public Authorities on Entities that Operate in a Specific Market

Comments to be received by 5 September 2012

[Draft] IFRIC INTERPRETATION

**Levies Charged by Public
Authorities on Entities that
Operate in a Specific Market**

Comments to be received by 5 September 2012

DI/2012/1

Draft IFRIC Interpretation DI/2012/1 *Levies Charged by Public Authorities on Entities that Operate in a Specific Market* is published by the International Accounting Standards Board (IASB) for comment only. Comments on the draft Interpretation should be sent in writing so as to be received by **5 September 2012**. Respondents are asked to send their comments electronically to the IFRS Foundation website (www.ifrs.org) using the 'Open to Comments' page with a copy emailed to ifric@ifrs.org.

All responses will be put on the public record unless the respondent requests confidentiality. However, such requests will not normally be granted unless supported by good reason, such as commercial confidence.

The IASB, the International Accounting Standards Committee Foundation (IASCF), the authors and the publishers do not accept responsibility for loss caused to any person who acts or refrains from acting in reliance on the material in this publication, whether such loss is caused by negligence or otherwise.

INVITATION TO COMMENT

[DRAFT] IFRIC INTERPRETATION X
LEVIES CHARGED BY PUBLIC AUTHORITIES ON ENTITIES THAT
OPERATE IN A SPECIFIC MARKET

APPENDIX A—EFFECTIVE DATE AND TRANSITION

ILLUSTRATIVE EXAMPLES

BASIS FOR CONCLUSIONS

INVITATION TO COMMENT

The International Accounting Standards Board's IFRS Interpretations Committee invites comments on any aspect of this draft Interpretation *Levies Charged by Public Authorities on Entities that Operate in a Specific Market*. Comments are most helpful if they indicate the specific paragraph to which they relate, contain a clear rationale and, when applicable, provide a suggestion for alternative wording.

Comments should be submitted in writing so as to be received no later than **5 September 2012**.

Question 1—Scope

The draft Interpretation addresses the accounting for levies that are recognised in accordance with the definition of a liability provided in IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*. Levies that are within the scope of the draft Interpretation are described in paragraphs 3–5.

Do you agree with the scope proposed in the draft Interpretation? If not, what do you propose and why?

Question 2—Consensus

The consensus in the draft Interpretation (paragraphs 7–12) provides guidance on the recognition of a liability to pay a levy.

Do you agree with the consensus proposed in the draft Interpretation? If not, why and what alternative do you propose?

Question 3—Transition

Entities would be required to apply the draft Interpretation retrospectively in accordance with IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*.

Do you agree with the proposed transition requirements? If not, what do you propose and why?

[Draft] IFRIC Interpretation *Levies Charged by Public Authorities on Entities that Operate in a Specific Market* (IFRIC X) is set out in paragraphs 1–12 and Appendix A, and is accompanied by Illustrative Examples and a Basis for Conclusions. The scope and authority of Interpretations are set out in paragraphs 2 and 7–16 of the *Preface to International Financial Reporting Standards*.

[DRAFT] IFRIC INTERPRETATION X

Levies Charged by Public Authorities on Entities that Operate in a Specific Market

References

- IAS 1 *Presentation of Financial Statements*
- IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*
- IAS 12 *Income Taxes*
- IAS 34 *Interim Financial Reporting*
- IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*
- IFRIC 6 *Liabilities arising from Participating in a Specific Market—Waste Electrical and Electronic Equipment*

Background

- 1 A public authority may impose a levy on entities that operate in a specific market. Examples of public authorities include national governments, regional governments (for example, state, provincial, territorial), local governments (for example, city, town) and their component entities (for example, departments, agencies, boards, commissions).
- 2 The IFRS Interpretations Committee has received requests for guidance on the accounting for levies in the financial statements of the entity paying the levy. The questions relate to when the liability to pay a levy should be recognised and to the definition of a present obligation in IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*.

Scope

- 3 The [draft] Interpretation addresses the accounting for levies that are recognised in accordance with the definition of a liability that is provided in IAS 37.
- 4 This [draft] Interpretation does not address the accounting for:
 - (a) income taxes that are within the scope of IAS 12 *Income Taxes*, ie taxes based on a taxable profit (ie a net amount of revenues and expenses);

- (b) levies that are due only if a minimum revenue threshold is achieved;
 - (c) fines or other penalties imposed for breaches of the legislation; and
 - (d) contracts between a public authority and a private entity.
- 5 Levies within the scope of this [draft] Interpretation have the following characteristics:
- (a) they require a transfer of resources to a public authority (or to a third party designated by a public authority) in accordance with legislation (ie laws and/or regulations);
 - (b) they are paid by entities that operate in a specific market as identified by the legislation (such as a specific country, a specific region or a specific market in a specific country);
 - (c) they are non-exchange transactions, ie transactions in which the entity paying the levy does not receive any specific asset in direct exchange for the payment of the levy;
 - (d) they are triggered when a specific activity identified by the legislation occurs (such as operating in a specific country or operating in a specific market in a specific country); and
 - (e) the calculation basis of the levy uses data for the current period or a previous reporting period, such as the gross amount of revenues, assets or liabilities.

Issues

- 6 To clarify the accounting for a levy, this [draft] Interpretation addresses the following issues:
- (a) What is the obligating event that gives rise to a liability to pay a levy?
 - (b) Does the economic compulsion to continue to operate in a future period create a constructive obligation to pay a levy that will arise from operating in that future period?
 - (c) Does the going concern principle imply that an entity has a present obligation to pay a levy that will arise from operating in a future period?

- (d) Does the recognition of a liability to pay a levy arise at a point in time or does it, in some circumstances, arise progressively over time?
- (e) Can the levy expense be anticipated or deferred in the interim financial statements?

Consensus

- 7 The obligating event that gives rise to a liability to pay a levy is the activity that triggers the payment of the levy as identified by the legislation. For example, if the activity that triggers the payment of the levy is the generation of revenues in the current period and the calculation of that levy is based on revenues generated in a previous period, the obligating event for that levy is the generation of revenues in the current period.
- 8 An entity does not have a constructive obligation to pay a levy that will arise from operating in a future period as a result of being economically compelled to continue operating in that future period.
- 9 The preparation of financial statements under the going concern principle does not imply that an entity has a present obligation to continue to operate in the future and therefore does not lead to the entity recognising a liability at a reporting date for levies that will arise from operating in a future period.
- 10 The liability to pay a levy is recognised progressively if the obligating event occurs over a period of time (ie if the activity that triggers the payment of the levy, as identified by the legislation, occurs over a period of time). For example, a liability to pay a levy is recognised progressively if the obligating event is the progressive generation of revenues in the current period over a period of time.
- 11 The liability to pay a levy that is within the scope of this draft Interpretation gives rise to an expense.
- 12 The same recognition principles shall be applied in the interim financial statements as are applied in the annual financial statements. As a result, in the interim financial statements, the levy expense should not be:
 - (a) anticipated if there is no present obligation to pay the levy at the end of the interim reporting period; or
 - (b) deferred if a present obligation to pay the levy exists at the end of the interim period.

Appendix A

Effective date and transition

This appendix is an integral part of the [draft] Interpretation and has the same authority as the other parts of the [draft] Interpretation.

- A1 An entity shall apply this [draft] Interpretation for annual periods beginning on or after [date]. Earlier application is permitted. If an entity applies this [draft] Interpretation for an earlier period, it shall disclose that fact.
- A2 Changes in accounting policies resulting from the initial application of this [draft] Interpretation are accounted for retrospectively in accordance with IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*.

IFRIC X Levies Charged by Public Authorities on Entities that Operate in a Specific Market

[DRAFT] Illustrative examples

These examples accompany, but are not part of, the [draft] Interpretation.

- IE1 The objective of these examples is to illustrate the accounting for the liability to pay a levy in the annual and in the interim financial statements.

Example 1—A levy is triggered progressively as the entity generates revenues in a specific market

Entity A has an annual reporting period that ends on 31 December. A levy is triggered progressively as Entity A generates revenues in a specific market in 20X1. The amount of the levy is determined by reference to revenues generated by Entity A in the market in 20X1.

In this example, the liability is recognised progressively during 20X1 as the entity generates revenues, because the obligating event, as identified by the legislation, is the progressive generation of revenues during 20X1. At any point in 20X1, Entity A has a present obligation to pay a levy on revenues generated to date. Entity A has no present obligation to pay a levy that will arise from generating revenues in the future. In other words, the obligating event occurs progressively during 20X1, because the activity that triggers the payment of the levy, as identified by the legislation, occurs progressively during 20X1.

In the interim financial report (for example at 30 June 20X1), Entity A has an obligation to pay the levy on revenues generated from 1 January 20X1 to the end of the interim period. As a result, an expense that is based on revenues generated in each respective interim period is recognised in the corresponding 20X1 interim periods.

Example 2—A levy is triggered in full as soon as the entity generates revenues in a specific market

Entity B has an annual reporting period that ends on 31 December. A levy is triggered in full as soon as Entity B generates revenues in a specific market in 20X1. The amount of the levy is determined by reference to revenues generated by Entity B in the market in 20X0. Entity B generated revenues in the market in 20X0 and starts to generate revenues in the market in 20X1 on 3 January 20X1.

In this example, the liability is recognised in full on 3 January 20X1 because the obligating event, as identified by the legislation, is the first generation of revenues in 20X1. The generation of revenues in 20X0 is necessary, but not sufficient, to create a present obligation to pay a levy. Before 3 January 20X1, Entity B has no obligation. In other words, the activity that triggers the payment of the levy as identified by the legislation is the first generation of revenues at a point in time in 20X1. The generation of revenues in 20X0 is not the activity that triggers the payment of the levy. The amount of revenues generated in 20X0 only affects the measurement of the liability.

In the interim financial report, because the liability is recognised in full on 3 January 20X1, the expense is recognised in full in the first interim period of 20X1. The expense shall not be deferred until subsequent interim periods and shall not be anticipated in previous interim periods.

Example 3—A levy is triggered if the entity operates as a bank at the end of the annual reporting period in a specific market

Entity C has an annual reporting period that ends on 31 December. A levy is triggered only if Entity C operates as a bank at the end of the annual reporting period in a specific market. The amount of the levy is determined by reference to amounts in the balance sheet of Entity C at the end of the annual reporting period. The end of the annual reporting period of Entity C is 31 December 20X1.

In this example, the liability is recognised on 31 December 20X1 because the obligating event, as identified by the legislation, is to operate as a bank at the end of the annual reporting period. Before the end of the annual reporting period, Entity C has no present obligation to pay a levy, even if it is economically compelled to continue to operate in the future and to operate as a bank at the end of the annual reporting period. In other words, the activity that triggers the payment of the levy as identified by the legislation is to operate as a bank at the end of the annual reporting period, which does not occur until 31 December 20X1. Even if the amount of the liability is based on the length of the reporting period, that does not imply that the liability should be recognised progressively during 20X1, because the obligating event is to operate as a bank at the end of the annual reporting period.

In the interim financial report, because the liability is recognised in full on 31 December 20X1, the expense is recognised in full in the last interim period of 20X1. The expense shall not be deferred until subsequent interim periods and shall not be anticipated in previous interim periods.

Basis for Conclusions on IFRIC X Levies Charged by Public Authorities on Entities that Operate in a Specific Market

This Basis for Conclusions accompanies, but is not part of, [draft] IFRIC X.

Introduction

- BC1 This Basis for Conclusions summarises the considerations of the IFRS Interpretations Committee (the Interpretations Committee) in reaching its consensus. The Interpretations Committee received a request to clarify whether, under certain circumstances, IFRIC 6 *Liabilities arising from Participating in a Specific Market—Waste Electrical and Electronic Equipment* should be applied by analogy to identify the obligating event that gives rise to a liability for other levies charged by public authorities on entities that operate in a specific market. The questions relate to when the liability to pay a levy should be recognised and to the definition of a present obligation in IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*.
- BC2 In particular, the concerns expressed in the request relate to what accounting treatment an entity should apply to levies, the calculation of which is based on financial data that, in turn, is related to a period preceding the period in which the activity that triggers the payment of the levy occurs. For example, the activity that triggers the payment of the levy, as identified by the legislation, occurs in 20X1 and the calculation of the levy is based on financial data for 20X0 (see Illustrative Example 2).
- BC3 The Interpretations Committee was informed that there was diversity in practice in how entities account for the obligation to pay such a levy.

Scope

- BC4 The Interpretations Committee observed that the question raised in the submission relates to how to account for levies whose calculation basis uses data for the current or a previous reporting period, such as the gross amount of revenues, assets or liabilities. The Interpretations Committee noted that those levies do not meet the definition of income taxes provided in IAS 12 *Income Taxes* because they are not based on taxable profit. The Interpretations Committee noted that the term ‘taxable profit’ implies a notion of a net amount of revenues and expenses. The Interpretations Committee also noted that those levies

that are not within the scope of IAS 12 are recognised in accordance with the definition of a liability that is provided in IAS 37. As a result, this [draft] Interpretation addresses the accounting for levies that are recognised in accordance with the definition of a liability that is provided in IAS 37.

- BC5 This [draft] Interpretation addresses the accounting for levies that are non-exchange transactions, ie transactions in which the entity paying the levy transfers resources to a public authority (or to a third party designated by a public authority) without receiving any specific asset in direct exchange for the payment of the levy. The Interpretations Committee noted that the scope of this [draft] Interpretation covers the majority of levies, but that judgement would be required in certain instances to determine whether the entity paying the levy receives an asset in direct exchange for the payment of the levy (such as rights to receive specific future goods or services).
- BC6 This [draft] Interpretation does not address the accounting for contracts between a public authority and a private entity (including levies that are in substance payments related to a contract with a public authority).
- BC7 This [draft] Interpretation does not address the accounting for levies that are due only if a minimum revenue threshold is achieved in the current period because the Interpretations Committee did not reach a consensus as to whether the obligating event is:
- (a) the generation of revenues only after the threshold is passed; or
 - (b) the generation of revenues as the entity makes progress towards the revenue threshold (the existence of the threshold being taken into account when assessing whether the obligation should be recognised).

What is the obligating event that gives rise to a liability to pay a levy?

- BC8 According to the definition in paragraph 10 of IAS 37, an obligating event is an event that creates a legal or constructive obligation that results in an entity having no realistic alternative to settling the obligation. According to paragraph 14(a) of IAS 37, a provision should be recognised only when an entity has a present obligation as a result of a past event. The Interpretations Committee noted that the main consequence of these requirements is that there can be only one single obligating event. The Interpretations Committee acknowledged that, for an obligating

event to exist, it may in some circumstances be the case that other events must have occurred previously. For example, for levies charged by public authorities, the Interpretations Committee observed that, in certain circumstances, the entity paying the levy must have undertaken an activity both in the previous and in the current period in order to be required to pay a levy. The Interpretations Committee noted that the activity undertaken in the previous period is necessary, but not sufficient, to create a present obligation.

- BC9 Consequently, the Interpretations Committee concluded that the obligating event that gives rise to a liability to pay a levy is the activity that triggers the payment of the levy, as identified by the legislation. In other words, the liability to pay a levy is recognised when the activity that triggers the payment of the levy, as identified by the legislation, occurs. For example, if the activity that triggers the payment of the levy is the generation of revenues in 20X1 and the calculation of that levy is based on revenues generated in 20X0, the obligating event for that levy is the generation of revenues in 20X1 (see Illustrative Example 2).

Does the economic compulsion to continue to operate in a future period create a constructive obligation to pay a levy that will arise from operating in that future period?

- BC10 The Interpretations Committee considered an argument that if it would be necessary for an entity to take unrealistic action in order to avoid the obligation to pay a levy (for example to withdraw from the market), then a constructive obligation to pay the levy exists and a liability should be recognised. For example, in the case in which the activity that triggers the payment of the levy occurs in 20X1 and the calculation of the levy is based on financial data for 20X0 (as in Illustrative Example 2), some argue that a liability should be recognised in 20X0. Supporters of this argument emphasise the definition of a constructive obligation in paragraph 10 of IAS 37 and point out that an entity might in practice have no realistic alternative other than to continue to operate in the market in the next period.
- BC11 The Interpretations Committee rejected this argument, noting that a levy charged by a public authority is incurred as a result of operating in a specified period, ie it is an operating cost of the period in which it is triggered according to the legislation. Paragraphs 18 and 19 of IAS 37 state that no provision is recognised for costs that need to be incurred to operate in the future or when the obligation does not exist independently of the entity's future conduct of the business. The Interpretations

Committee observed that, when an entity has an economic compulsion to incur operating costs that relate to the future conduct of the business, it does not create a constructive obligation and does not lead to the entity recognising a liability. This point is illustrated in the examples accompanying IAS 37.

- BC12 In particular, the Interpretations Committee concluded that there is no constructive obligation to pay a levy that relates to the future conduct of the business, even if:
- (a) it is economically unrealistic for the entity to avoid the levy if it has the intention of continuing in business;
 - (b) there is a legal requirement to incur the levy if the entity does continue in business;
 - (c) it would be necessary for an entity to take unrealistic action to avoid the levy, such as to sell, or stop operating, property, plant and equipment;
 - (d) the entity made a statement of intent to operate in the market in the future period(s); or
 - (e) the entity has a legal or contractual requirement to operate in the market in the future period(s) (for example because of contractual requirements arising from purchase or sale contracts).
- BC13 Consequently, the Interpretations Committee concluded that an entity does not have a constructive obligation at a reporting date to pay a levy that will arise from operating in a future period as a result of being economically compelled to continue operating in that future period. This is because this levy cost relates to the future conduct of the business and is an operating cost of that future period.

Does the going concern principle imply that an entity has a present obligation to pay a levy that will arise from operating in a future period?

- BC14 The Interpretations Committee noted that this issue is related to the fundamental basis of preparing financial statements. Some question whether the going concern principle affects the timing of the recognition of the liability to pay a levy.

- BC15 The Interpretations Committee observed that IAS 1 *Presentation of Financial Statements* sets out general features for the financial statements, including the accrual basis of accounting and the going concern principle. The Interpretations Committee noted that, when an entity prepares financial statements on a going concern basis, it shall also apply the accrual basis of accounting and shall comply with all the recognition and measurement provisions of IFRSs. Consequently, the Interpretations Committee concluded that the going concern principle cannot lead to the recognition of a liability that does not meet the definitions and recognition criteria set out in IAS 37.
- BC16 Specifically, the Interpretations Committee concluded that the preparation of financial statements under the going concern principle does not imply that an entity has a present obligation to continue to operate in the future and therefore does not lead to the entity recognising a liability at a reporting date for levies that will arise from operating in a future period. Paragraphs 18 and 19 of IAS 37 specify that no provision is recognised in that case.

Does the recognition of a liability to pay a levy arise at a point in time or does it, in some circumstances, arise progressively over time?

- BC17 The Interpretations Committee observed that most of the liabilities in IAS 37 and in the Illustrative Examples accompanying IAS 37 are recognised at a point in time, ie at the point in time when the obligating event occurs. Nevertheless, they noted that in one example accompanying IAS 37 the liability is recognised progressively over time.
- BC18 In Illustrative Example 3 accompanying IAS 37, an entity operates an offshore oilfield and is required to restore the seabed because of the damage that will be caused by the extraction of oil. According to this example, the restoration costs that arise through the extraction of oil are recognised as a liability when the oil is extracted. The Interpretations Committee noted that in this example, the damage is directly caused by the extraction of oil, and that more damage occurs when more oil is extracted. Thus, the outcome is that the liability for damage that is caused over time is recognised progressively over time as the entity extracts oil and causes damage to the environment.

- BC19 The Interpretations Committee discussed whether this outcome is linked to a recognition issue or to a measurement issue and concluded that this is a recognition issue, because the obligating event (ie the damage caused by the extraction of oil) occurs progressively over a period of time. In accordance with paragraph 19 of IAS 37, the Interpretations Committee noted that a present obligation exists to the extent of the damage caused to date to the environment, because the entity has no present obligation to rectify the damage that will result from the extraction of oil in the future (ie the future conduct of its business).
- BC20 Consequently, the Interpretations Committee concluded that the liability to pay a levy is recognised progressively if the obligating event (ie the activity that triggers the payment of the levy as identified by the legislation) occurs over a period of time. For example, a liability to pay a levy is recognised progressively if the obligating event is the progressive generation of revenues in the current period over a period of time (see Illustrative Example 1).

Can the levy expense be anticipated or deferred in the interim financial statements?

- BC21 IAS 34 *Interim Financial Reporting* (paragraph 29) states that the same recognition principles should be applied in the annual and the interim financial statements. Applying the requirements of IAS 34 (paragraphs 31, 32, 39, B2, B4 and B11), no liability should be recognised at the end of an interim reporting period if the obligating event has not yet occurred. For example, an entity does not have an obligation at the end of an interim reporting period if the present obligation arises only at the end of the annual reporting period.
- BC22 As a result, if there is no present obligation to pay a levy at the end of an interim reporting period, the expense should not be anticipated even if the costs associated with the levy are incurred irregularly during the financial year and tend to recur from year to year. Similarly, if a present obligation to pay a levy exists at the end of an interim reporting period, the expense should not be deferred even if the costs associated with the levy are incurred irregularly during the financial year and tend to recur from year to year.
- BC23 This does not preclude an entity from recognising a prepayment as an asset when the entity has paid the levy but does not have yet a present obligation to pay the levy.
